

## **REGIONS HOSPITAL CAR SEAT CLINIC – SAFETY GUIDELINES**

*Updated 7/5/2020*

In an effort to keep all participants safe, and to minimize risk of illness, we require the following while attending a car seat clinic appointment:

1. Pre-screening for all people in the vehicle prior to entering the garage
  - a. Screening questionnaire
2. All family members must wear a mask (children under 2 years old exempt)
  - a. We won't have extra masks available so please come prepared with your own
  - b. We encourage limiting the number of family members attending the clinic in a single vehicle
3. We will have hand sanitizer available and ask that family members hand sanitize before the education begins.
4. Public restrooms will not be available for use.
5. Please remain near your vehicle during the entire visit.

We traditionally encourage that you bring your child with you to the appointment. However, we recommend leaving your child at home if possible due to the restricted nature of the visit. If you are unable to leave your child at home, he/she is welcome to come-adhering to the screening guidelines and mask requirement (children under 2 years old exempt from wearing a mask).

If your child does not attend, you may bring a picture of your child in the car seat for us to review. Please also make note of where the harness straps are relative to the child's shoulders – 1. Even with, 2. Above, 3. Below

### **Our CPST staff will**

1. Limit the number of appointments to maximize distance and allow for hand hygiene between each appointment
2. Wear a mask
3. Wear goggles or a face shield
4. Don new gloves for your family's encounter
5. Hand sanitize between each family encounter
  - a. This will always include hand sanitizer
  - b. This may also include hand washing
