

Huge

Anti-aging Discovery

A catalyst is a substance that speeds up a chemical reaction.

They are not used up and are not part of the end product. They bring in an unknown energy. Jim Kaszyk, inventor and Chemist with numerous accolades wanted to learn their secrets and instead of making reactions go faster, he wanted to use them to create very high potency ingredients. In 1989 he created Special Proprietary Catalytic Towers. Their purpose was to harness a theoretical Renewal Supporting Energy, also called Subtle Energy, that could create very high potency ingredients and maybe make people look forever young. At first, the Catalytic Towers worked marginally, but over the years they were refined. In 2014 a peer reviewed Science Journal published a big study proving they worked.

Einstein predicted these energies should exist, but not here.

These energies were so extraordinary they came from another dimension called the ETHERIC and we could only see their effect when they coupled with matter here, but no one could consistently harness them. Kaszyk was successful and his company, The Ageless Secret, uses his Catalytic Towers to bring in Etheric Energy to create micro particle, Gel-like water and very high potency ingredients. Photos show the formulas make people look progressively younger. The following information offers detailed scientific proof of this revolutionary discovery...

Abstract

The UV absorption spectrum of exclusion zone (EZ) water has been used to define the unique signature of this type of water structure. Specifically, an absorption peak at a **wavelength of 270 nm** is found to be characteristic of EZ water. We present experimental evidence that this same behavior can be found in certain bulk waters. This includes waters not contaminated by organic substances that are known to absorb UV radiation at this wavelength.

We present UV absorption data for bulk water treated using a remote treatment method (CATALYTIC TOWERS) (both before and after treatment) that shows the characteristic 270 nm peak (Proof of “Ring Structure, Normally Seen With Ice”) after such treatment. In addition, an inflection point (shoulder) at 210 nm is found which is a new spectroscopic feature for this type of treated water. **These treated waters also show unique and characteristic light scattering features that have not been reported before. (Proof of Micro Particles and Gel-like Crystal Formation)** Anomalous turbidity enhanced by the input of mechanical energy appears to be characteristic of these treated waters.

A Letter From The William A. Tiller Institute, (the the lab that did the big 2 year study published March 2014) , Expressing Their Delight and Astonishment Over the Huge NEW Energy Discovery!

When Jim Kaszyk first asked us to determine if a sample of his product contained Subtle Energy, we were reluctant. It was nothing personal, but over a period of years, we had tested many Subtle Energy products and few responded with a clear or consistent Subtle Energy signature. **By the time Jim came along, we had become dubious of claims made of this nature.**

This energy was given the name Subtle Energy by Dr. Tiller many years ago, not because the energy was weak, but because it was difficult to capture or to nail it down. Another frustration among us and other researchers was that attempts to measure Subtle Energy usually involved the human energy field either in the measurement or in its creation. Critics could say that it was all just the placebo effect or wishful thinking. The tests we had developed earlier did not incorporate the human energy field into the testing process but were complicated and took weeks. However, more recently developed tests did not involve the human energy field in the process and were much more easy to perform.

The water samples, called Sun Lovers Mist, which Kaszyk sent were supposedly Subtle Energy infused and contained only water and subtle energy. **One characteristic of Subtle Energy is that it produces anomalies that are difficult to explain via conventional physics.** Surprisingly, these samples had so much Subtle Energy; they allowed us to create new test procedures to measure the amount of Subtle Energy by making turbidity measurements. **That is, the Subtle Energy caused the bulk water to form micro clusters that scattered light as if they were tiny particles even though other test procedures showed there was only water present with no physical particles.**

Additional tests using a UV Spectrophotometer showed a peak at 270 nm. This also verified the presence of the extraordinary structure seen in the water. Normally, pure spring water, which is the basis of what Kaszyk's Sun Lovers Mist is, does not show this peak even a little. **A peak at 270nm is usually only seen when a 6 carbon atom ring type structure is present, but here we have only pure water showing it.** Again this is another exception to our laws of conventional science and it is more proof that verifies the presence of Subtle Energy. **Prior to this, Subtle Energy was considered to be a "theoretical energy".** Now its existence has been proven and we have ways to measure it. **This is huge for science because Subtle Energy is observed to be Organizing energy** and challenges our ideas about entropy creation. **We also believe this energy moves at speeds in excess of the speed of light, which challenges our current paradigm of what is possible.**

Einstein's Equation and Subtle Energy

$$E = \frac{mc^2}{\sqrt{1-v^2/c^2}}$$

Most of us are familiar with $E=MC^2$ but that is not the complete equation. The complete Einstein Equation shows how Energy increases as the Velocity increases compared to C the speed of light. If the speed for V is smaller than 100,000 miles per hour the bottom part of the equation becomes insignificant and the equation becomes $E= MC^2$. Above that speed, the curve rises sharply up to C the speed of light. If the speed for V is greater than the speed of light, 186,000 miles per second, the equation gives values that are the square root of a negative number which are imaginary numbers. Einstein and other physicists said these ridiculous numbers were proof that something could not move faster than the speed of light. **However, he later said that energy could move faster than the speed of light, but only in another dimension.**

This graph is from the research of Dr. William Tiller, PhD. In 1989, the book **Vibrational Medicine** by **Richard Gerber, MD** was published. When Jim Kaszyk read the book and saw Tiller's graph, his life was forever changed. **Jim was skeptical at first, but the graph convinced him that Energy could theoretically move faster than the speed of light.**

The two curves are made by substituting different values for V in the above equation. The curve at the top left starts at zero and shows that as the Velocity increases, Energy increases. This upper curve represents all of the **Ordinary Energies** we can feel, touch and measure. **The curve at the bottom right was produced by substituting speeds for V greater than the speed of light. Notice how when the speed exceeds C there is a huge change. A complete flip has occurred and the graph shows a mirror image of the curve above. These imaginary numbers predict the existence of another dimension and a revolutionary spectrum of Extraordinary Energies known as Subtle Energies.**

Scientists know Subtle Energies exist because they temporarily produce results contrary to the laws of physics. Because the exceptions were so enormous, critics said if Subtle Energy could be proven it would revolutionize all of science.

In March of 2014, research was published in the journal WATER, proving the existence of Subtle Energy. Here is a quote from that: **“Kaszyk created a process using proprietary catalytic towers that work energetically to interact with matter when it is coupled with the subtle energy field. The result is Kaszyk, unknowingly concentrated a new form of subtle energy...”** These are the **Renewal Supporting Energies** we bring in from the other dimension, Etheric, and infuse, “couple with”, ingredients in the **Ageless Secret™!**

Life Energy? Energy in a bottle? Is this for real?

You be the judge!

30 Second, Incredible, “No Touch, Through the Glass” Energy TEST...

Get a glass of cold water. First, test your Life Energy by wrapping your clean hands around the glass and hold for 30 seconds. Test the water on your skin. Does it feel like a lotion? For children under the age of 10 it does. For most adults the answer will be no!*

Next, apply to your palms 8 sprays of The Ageless Secret Renewal Support Formula™. Rub your palms together. Wrap both hands on the glass of water and hold for 30 seconds. Take some of the treated water and place it on your forearm or any other skin. Spread it around. It feels slippery, almost like a lotion. *Now press it repeatedly as it begins to dry and notice that the water feels sticky!* When it dries completely the skin will feel soft almost like it does with The Ageless Secret. Taste the water. Your tongue can sense softness and texture. The texture of the water changed. It will have formed micro particles and a crystal type structure. The effect is temporary, but it will feel Bigger! Softer! Smoother!

So why does this work? It is NOT magic or a miracle. It is New Great Science. Your skin has Life Energy, an energy that we cannot see, but let's imagine it is a white light and use the analogy of a light bulb and a dimmer. In young people the light bulb shines brightly. As we age, the energy weakens and the bulb begins to get dimmer. When the energy in The Ageless Secret is applied to the skin it's like turning up the dimmer and the light bulb glows brightly like when you were young. When you held the glass of water with both treated hands this bright light “shines” through the glass and changes the water making it feel and behave different than normal water.

* By the way, we discovered this, because we tested adults and young people. Under the age of 10, Life Energy is strong enough to create micro particle water naturally helping them look young! Adults, as they aged lost some Life Energy and need this Renewal Supporting Replacement Energy to help them look young again.
