

## Feds Funding Effort To Tie Medical Services To Social Needs

"The federal government has announced a \$157 million project to help hospitals and doctors link Medicare and Medicaid patients with needed social services that sometimes have a bigger effect on their health than medical interventions. Even with medical care easily available, patients are often limited in their ability to get better or maintain good health if they lack stable housing, access to healthful food or the ability to get to and from medical appointments..."(from NPR Public Health) [Read Full Article Here](#)

## NEW OACHC PARTNER

### Welcome New Bronze Corporate Partner, Evi-Base!

Evi-Base offers Health Management and Prevention Program Solutions... Delivered Where People Live, Work and Worship. Evi-Base links evidence-based, community-based health self-management education and the patient-centered care system. MyLife programs engage patients and their caregivers. This intervention improves the health of patients with chronic conditions, and serves our diverse population and special patient groups with complex, multiple chronic conditions. Full Service Programs include, MyLife and Chronic Conditions, MyLife and Diabetes and MyLife and Chronic Pain.

Contact Mary Jayne Reedy for more information on how Evi-Base can work for you!
