MATTHEW'S STORY

Matthew Walker is the son of Jonathan & Cynthia Walker of Heathrow, Florida. He is one of three children, Morgan is 13 years old and Adam is 8. Matthew is now 10 years old. He is 1 of approximately 40 known males in the world born with a rare neuronal migration disorder of the brain called Subcortical Band Heterotopia. This disorder is one in which the white and grey matter of Matthew's brain are disorganized causing the communication pathways of the brain to be challenged, therefore causing significant impairment in his physical and cognitive abilities. Matthew is unable to walk or speak and is dependent upon his family and professionals to complete his activities of daily living. Matthew has a rare form of epilepsy know as Lennox Gastaut Syndrome. Matthew will experience Tonic-clonic (Grand Mal) seizures and head drop events that are potentially fatal but are currently being managed to some degree by an ongoing change to his medication regimen. This past year presented more challenges for Matthew as he continues to struggle with seizure and respiratory issues. Medication options have become limited. A Corpus Callosotomy and Vagus Nerve Stimulation (VNS Therapy) surgical procedures are now serious considerations for seizure control. Matthew is currently enrolled at Wicklow Elementary in Sanford Florida. Wicklow Elementary has the facility and specialized professionals trained in speech, occupational & physical therapies in order to assist Matthew reach his potential. He has been limited to attending school the past two years to two days per week due to his health conditions. The Annual Golf Tournament was created to assist financially in the care, special facilities, and medical attention that his ongoing disabilities require.
