SofTILE™ KrosLOCK®

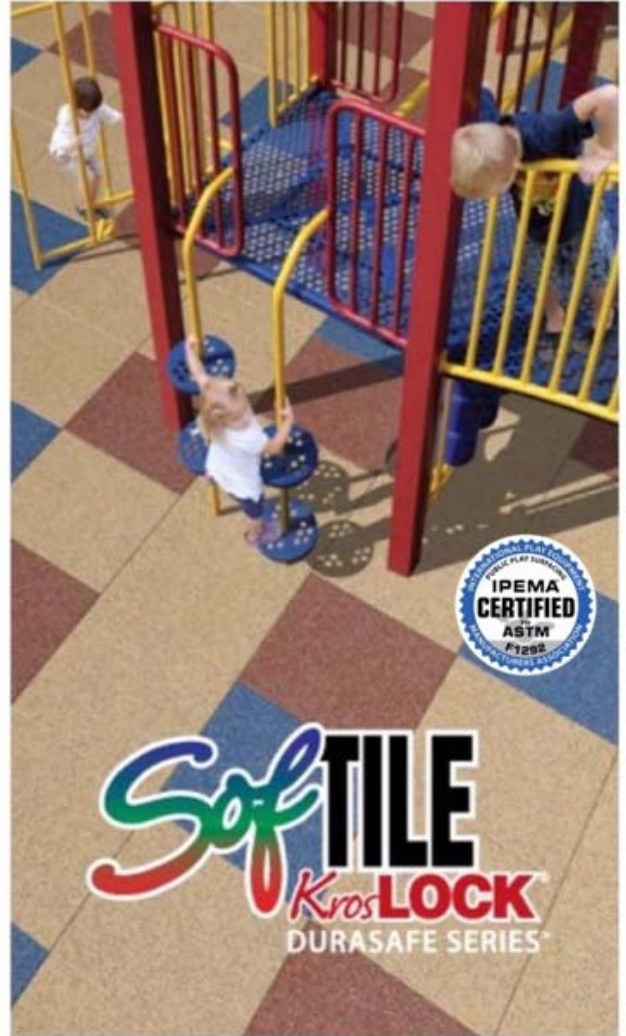

Distributed by PlayMax®

WORLD CLASS SAFETY TILES FROM PLAYMAX

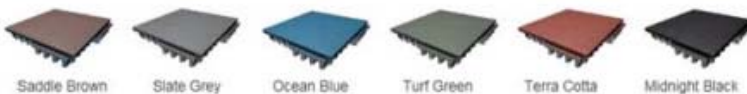

PlayMax has partnered with industry leader SofSURFACES to provide state-of-the-art **SofTILE KrosLOCK playground surfacing tiles**. These are the same, high quality tiles found at top playgrounds throughout the world, and are now available to PlayMax customers and authorized applicators.

What is really great about this partnership is SofSURFACES premium tile lines use Rosehill TPV rubber granules molded into their wearing surface. These are the same, high-quality Rosehill TPV granules used in PlayMax poured-in-place playground surfacing systems. This expands the creative capabilities of designers of park and school playground projects considerably. How about one area using MaxPour and the other is matching SofTILE playground tiles? No problem with PlayMax. What a great design tool for architects, designers and the kid in all of us.

Matching Rosehill TPV surfaces available exclusively through PlayMax.

SofTILE Plus Series Playground Tiles

SofTILE Premium Series

A Wider Range of Standard Colors

If you're looking to integrate unique color blends into your playground design, you have come to the right place. In fact, custom color blending is our specialty. Creating virtual samples is just a mouse click away with our interactive custom color blending tool. Best of all, there is no additional charge to incorporate custom colors into your design.
