STORAGE BUILDING REQUIREMENTS

Requirements for a Proposed Residential Wood or Metal Storage Building

1. Plat Map of Property
The following **MUST** be clearly marked on map:
 - a. Dimensions of property
 - b. NEW structure
 - c. Dimensions of NEW structure
 - d. Building set back lines
2. Proposed Elevation Certificate (required for buildings 600 sq ft. or larger)
3. Final Elevation Certificate. Required **BEFORE** Occupancy Permit issued by Parish

Important Notes:

Should a building be proposed to be built within a flood zone, an elevation certificate will be required. For buildings 600 square feet or smaller, flow through equalization vents shall be required at a ratio of 1 square inch of opening per square foot of building size- with "x" length. Buildings larger than 600 square foot **MUST** be water tight.

Example: A 600 square foot building will require 60 square inches of vent area- Required vents shall be located on either side of building.
