

bear

archery 1968

... for those who want the finest

The most popular bows in archery are greater than ever!

For years, Bear bows have been the favorites of archers and bowhunters everywhere. Bear's continuous program of experimentation and research has improved bows consistently. These improvements have become industry standards.

1968 is another year of change. Basic changes, important changes. Improvements in the performance of both target and hunting bows to make them smoother, vibration- and recoil-free.

The Golden Triangle of Stability

The minute you latch onto a new Bear bow, you become part of the smoothest, most stable shooting instrument in archery.

A new design—The Golden Triangle of Stability—checks bow movement and keeps your arrow on target.

When you grip the newly designed handle, you actually become the apex of this triangle. The handle has been moved just the right amount forward to insure greater control over the factors which contribute to inconsistent arrow grouping. These bows have been designed to achieve best possible "dynamic balance," insuring simultaneous limb action; resulting in improved velocity and stability while minimizing "feel" of recoil shock.

The result of all this is a bow that takes up where you leave off. It's smooth and accurate, easily capable of 300 scores. It's a sure bet you'll raise your score the first time you use one.

The Golden Triangle of Stability can lick these common problems: "fishtailing" arrows, arrows "slapping" the bow, selecting proper arrows, uncomfortable "feel" of vibration and recoil.

Here's how it works:

1. As shown in Figure 1, the amount of movement around the bow's vertical axis is controlled by the Golden Triangle design—

Placing the axis of rotation at the apex of the triangle, by moving the fulcrum point forward of the base, (base being the line drawn between the points

where the bow limbs intersect the handle riser) insures a control of excessive rotation around the vertical axis due to inconsistencies in shooting techniques.

2. Figure 2 shows that the amount of movement around the bow's horizontal axis is also controlled by the Golden Triangle design—

Placement of the "pivot point" at the exact apex of the horizontal axis insures minimum movement around this axis due to inconsistent bowhand pressure which has previously magnified inaccuracies in vertical grouping.

3. As depicted in Figure 3, the perfect dynamic balance in relation to horizontal and vertical axes, coupled with a more nearly perfect coordination of limb action, gives you greater insurance against shooting errors.

Result: The Golden Triangle of Stability . . . gives you the ultimate in stability, higher scores, and the "perfect feel." Come to grips with the Golden Triangle, exclusively at your Bear dealer's.

Test the others . . . then try Bear

How stable are the new Bear bows? You can find out without ever shooting an arrow. String up your present bow. Try to move the string up and down while holding the bow vertically. If the limbs move two inches or more out of line, the vibration and dampening action will noticeably affect the arrow's flight. The bow's stability is less than perfect.

Try the same test with a new Bear bow. The limbs barely move. This illustrates the tremendous shooting stability of these new bows.

Try this test with any bow. You'll see that the 1968 Bear Golden Triangle bows are the most stable you can shoot.

New two-way grip . . . more comfortable than ever

This year, Bear introduces a revolutionary two-way grip that combines both the regular and pistol grip contours and feel. From one angle, it looks like a regular grip. Take another look and you'll swear it was a pistol grip. But no matter what it looks like, the feel is terrific. It's the most comfort-

able in archery. You've got to feel it to believe it!

The newest advancement in stabilizers . . . the Bear Omni-Coupler!

In addition to the built-in Golden Triangle of Stability in 1968 Bear bows, the Bear bowyer now offers you the newest development in stabilizers!

All stabilizers strive to regulate bow movement during the so called "archer's paradox;" that is, the movement of the bow away from the arrow as it "snakes" around the bow handle. The new Bear Omni-Coupler allows the archer to better regulate this bow movement, thereby improving arrow clearance.

At the "moment of paradox" during the shooting sequence, the Bear Omni-Coupler improves shooting accuracy and consistency by allowing the bow to move, while the new light-weight tubular rod and its weighted head remain relatively stationary.

The Bear Omni-Coupler counteracts the shock and vibration of the bow limbs after the arrow is released, creating faster dampening action and that s-m-o-o-t-h feel that is found only in bows from Bear.

The Bear Omni-Coupler also provides for variable adjustment of its compressible bushing to give you a really sharp bow tuning capability. Two of these compressible bushings, each interchangeable and of different densities, are furnished with each Bear Omni-Coupler.

In addition to the compressible bushings, there are two interchangeable heads of different weights and a light weight tubular rod. This allows you to select the right combination of weight, bushing and adjustment that will best complement your own personal shooting style.

Try the new Bear Omni-Coupler . . . it's a winner!

Now bowhunters can get tournament stability . . . introducing the new Bear Hunting Stabilizer!

The new Bear bowyer offers you the first hunting stabilizer—a compact, 3½"-long unit consisting of a chrome-

plated weighted head and a built-in flexible coupler.

The Bear Hunting Stabilizer offers you: (1) greater accuracy; (2) reduced string noise; (3) less bow movement; (4) better arrow clearance; (5) improved "feel."

The entire unit comes in a camouflaged case for use in eliminating undesirable reflections.

Order a Hunting Stabilizer with your 1968 Bear hunting bow. Get tournament stability in the field!

New Fred Bear Magnum Arrow with interchangeable points . . . specially designed by Fred Bear, the man who knows best! . . . it's another first from Bear.

Bear now offers an exciting new arrow, the Fred Bear Magnum Arrow with Converta-Points.

These finest of all hunting and field arrows are of a special tough aluminum alloy, made to Fred Bear's specifications by James D. Easton, and feature Fred's own patented system of interchangeable heads.

Converta-Points are not a conventional screw-in point. Arrow shafts are fitted with a specially-formulated insert material which accepts the threads of the screw-in Converta-Points. The special insert material insures a compressive, shock-resistant fit preventing the point from loosening on impact and eliminating "freeze up" as in the case of metal to metal. These arrows are available in four tubing sizes covering the entire range of hunting and field arrows from 40 to 80 pound draw weight. To make this arrow truly versatile, the shafts have been designed with the same inside diameter allowing all Converta-Points to fit all shafts.

The thread and long shank of the Converta-Point aligns the head. The end of the shaft and the high-strength shock-absorbing insert are flush against the shoulder of the Converta-Point to take the shock of impact, preventing loosening of the point and giving you the most rugged arrow available today. Developed basically as a hunting arrow with the needs of the hunter in mind,

the Fred Bear Magnum Arrow allows the hunter to practice with blunts in the field, even though the only target may be a hard, dry tree.

It's a four in one bargain!

The Converta-Point consists of: (1) a special adapter to fit Razorheads® or heads of your choice; (2) a blunt point matched to Razorhead weight; (3) a field point matched to Razorhead weight; (4) a 75 grain target point as a fourth choice.

All you need is a dozen "Magnums," your choice of Converta-Points, and you're set for big game hunting, small game hunting, field archery or hunting practice "in the field" when you need it most. Even target shooting, if you so desire.

Enjoy them all by changing from single point style to Converta-Points without special tools or techniques!

Get a dozen Fred Bear Magnums!

The man behind the new look . . . Owen Jeffery

Much of the new look and new performance of the 1968 Bear bows is the work of Bear's new master bowyer, Owen Jeffery.

O'Jeff's reputation in bowmaking preceded him to Bear. Although still a young man, he's had 17 years experience as a bowyer. He's worked with several of America's leading archery manufacturers and is himself an excellent tournament archer, as is his entire family.

O'Jeff arrived at Bear early in 1967 and went straight to work improving both the appearance and shooting characteristics of the entire Bear line . . . a task not to be envied. (Bear bows are used by more professional archers than any other bow, and a Bear bow has a permanent place in the Museum of Modern Art for its design.) But improve he did. The proof is in the complete line of 1968 Bear Target-Tournament, All-Purpose and Hunting Bows. They've never been more beautiful, nor more scientifically perfect.

Bear Quality . . . a Grayling tradition

Grayling, Michigan is known as the "Archery Capital of the World." Not only is the Bear Archery plant there,

but Grayling probably has more archers and bow hunters per capita than any place in the country. The people of Grayling make Bear bows, and they use them. They participate in weekly archery leagues. In season, they bow hunt daily, sometimes even on their lunch hour.

Being avid archers, they take pride in producing a product they personally use. The Bear manufacturing process makes use of modern machinery where possible. But it is that final personalized touch that really makes Bear bows outstanding. Each is hand sanded, hand lacquered, hand rubbed and personally checked. It is in this hand work that the citizens of Grayling excel. And it is because of their knowledge and love of archery that Bear bows and archery tackle are the world's finest.

Bear bows . . . choice of champions

Professional archers have acknowledged Bear as the bow to beat in tournament play. More pros use Bear bows than any other make. In the 1967 International Indoor Archery Championships in Detroit, more than half of the 1200 bows on the line were Bears. The event was won by "Gentleman Jim" Pickering of Salt Lake City and his Bear HC-30, with a record score of 596 out of a possible 600 points.

Later in the year, at the National Field Archery Championship in Jackson, Mississippi, Frank Gandy of Bartow, Florida, smashed all existing records with his Bear HC-30. Frank shot the first perfect animal round ever in NFAA competition. Previously, Frank rewrote the record books at home when he won the Florida state tournament. In California, Mrs. Francis Durff of Chico, using another Bear HC-30, took the California Women's Class A Freestyle Field Archery Championship.

In hunting, Fred Bear has taken just about every big game trophy in the world with a Bear bow. That includes a lion, a tiger, a polar bear . . . even an elephant!

Champions prefer Bear bows, but you don't have to be a champion to shoot one. Beginner or pro, when you shoot a Bear bow, you *feel* like a champion!

HC-300

300... the perfect tournament round. Previously, one of the magic numbers in sports, like the 4-minute mile. And here's the bow that can deliver perfection, the Tamerlane HC-300.

"If a person ever tuned himself to the point of shooting as well as this bow can shoot, he'd make perfect scores every time. The HC-300 is stably built to the point where human error won't show up as easily in this bow as in others."

That's "Gentleman Jim" Pickering talking, one of the top competitors in the Professional Archers Association. Jim shares our enthusiasm for the new Tamerlane HC-300.

"The new 1968 HC-300 is beautiful

... much lighter in weight," says Jim, "but it reacts the same way, if not better, than the old HC-30."

Although lighter in physical weight than last year's model, it is faster, smoother drawing, and amazingly stable. Thanks to the Golden Triangle design, the HC-300 remains virtually motionless on release, with nearly instant recoil dampening.

"Hand placement on the handle is always consistent, thereby providing better arrow flight." According to Jim, "You feel like you are a part of the bow."

The HC-300's new two-way grip conforms naturally and comfortably to any shooting style—has the feel of being

custom fitted for you.

"Tuning a Bear bow is easier than any other bow."

The Tamerlane HC-300 comes equipped with built-in Bear Premier Bowsight, incorporating adjustable arrow plate and a wide choice of arrow rests. You're ready for the firing line the moment you pull it from its pile-lined jet black bow case. (Optional Bear stabilizers attach in seconds to built-in Quick-Connects.)

"I shot my highest score in competition after shooting my Bear bow only three times."

Nuff said. See your Bear dealer . . . Jim Pickering did.

Standard Equipment: Bear Premier
Bowsight; Bear Custom Rest; Adjustable
Arrow Plate; Stabilizer Quick-Connect.
Length: 66", 69" and 72"
Weights: 25 to 50 lbs.

Comes in handsome 3505 jet black bow case

Bear Tamerlane HC-300
\$175⁰⁰

tamerlane®

Here's the bow that can be your ticket to the 1972 Olympics. The Bear Tamerlane . . . already a legend in its own time.

Note the bold, forward position of the handle. Set ahead of the rest of the bow, the handle forms a solid base for the Golden Triangle of Stability. It holds the balance and 3-way stability of this great bow during shooting.

Tamerlane embodies the same elegant appearance as the great HC-300. In addition to the East Indian Rosewood Tamerlane, there is a Lady Tamerlane. A gorgeous blond of Michigan

Hardrock Maple accented with East Indian Rosewood.

Both Tamerlanes have the new two-way grip and all the tournament features needed to personalize them to your shooting habits: Custom Arrow Rest, Adjustable Arrow Plate, and built-ins to accept the Bear Premier Bowsight and either Bear Stabilizer.

Start practicing for that Gold Medal right now. See your Bear dealer and the incomparable Bear Tamerlane.

Standard Equipment: Bear Custom Rest; Adjustable Arrow Plate; Stabilizer Quick-Connect.
Optional Equipment: Bear Premier Bowsight

Lengths: 66", 69" and 72" (Lady Tamerlane available in 66" length only)

Weights: 25 to 50 lbs.

Tamerlane

temujin®

(pronounced Tem-a-Gin)

Temujin . . . family name of the mightiest conqueror of all, Genghis Khan.

Temujin . . . the newest tournament bow from Bear. Designed and built in the Bear tradition of excellence.

Temujin . . . a bold new design based on an unusual concept of balanced "opposites." Note how every curve and flare is balanced by a corresponding shape on the opposite surface. Note, too, the rich shadings of East Indian Rosewood with contrasting exotic African Bubinga.

Temujin . . . stability far beyond any

bow you've ever used. The exclusive Golden Triangle of Stability delivers tournament-winning performance. Forward thrusting handle, quick dampening action, nearly vibrationless limbs are all trademarks of the smooth-shooting Temujin.

Temujin . . . all the features you need in a tournament bow. Comfortable two-way grip, Bear Custom Arrow Rest, Adjustable Arrow Plate, plus built-ins to readily receive the Bear Premier Bowsight and either stabilizer.

Temujin . . . newest tournament conqueror from Bear. See it now.

tartar

All new, tip to tip. That's the only way to describe the Bear Tartar.

The fine hand of our master bowyer is evident in the flaring contours of the handle that contrast with the smooth lines of the riser front. The wood is exotic Shedua, laminated to a gentle curve of Bubinga, blending into gracefully recurved white limbs.

Bear's exclusive two-way grip makes the Tartar as comfortable a bow as you'll ever handle. It also adds to its stability. Vibration is at a minimum.

The Tartar comes equipped with the Bear Custom Arrow Rest and Adjustable Arrow Plate, and will accept the Bear Premier Bowsight. The stabilizer Quick-Connect is located well below the bow hand. You'll get no interference when shooting with either Bear Stabilizer attached.

The Tartar delivers truly professional performance on a beginner's budget. Its modest price makes it an excellent starting bow for tournament shooting. See it at your Bear dealer's.

Standard Equipment: Bear Custom Rest; Adjustable Arrow Plate; Stabilizer Quick-Connect
Optional Equipment: Bear Premier Bowsight

bearcat®

The Bearcat has been designed to give you the most fun from archery —target shooting, field archery, even bowhunting.

It can hold its own in any "beauty contest" you may get into at a tournament. Its hand-hugging pistol grip flares out to form the eye-pleasing handle of imported Tigerwood. The limbs feature white Bearglas on the face and black on the back.

Even with all its beauty, once the Bearcat hits the game trails it will prove to be as rugged as the occasion demands. Fast shooting, too. In fact, the

Bearcat has the same velocity as the big Tamerlane. See this great bow at your Bear dealer's. It's three bows in one.

Length: 66"
Weights: 25 to 50 lbs.
Draw Limit: None
Glass Color: White face and black back
Riser Wood: Tigerwood
Specify right-or left-hand and draw weight
Weighed at 28" from front of arrow shelf

Bear Bearcat
\$52⁵⁰

tigercat®

Traditionally, the Tigercat is the finest recurve bow for the money. This year, Tigercat delivers even more.

The Tigercat's clean lines display the rich grains of tropical hardwoods along with black glass limbs. Together, they make an impressive sight.

Impressive shooting, too. Tremendous stability and swift cast have always been Tigercat trademarks. Whether your target is a haybale or a whitetail, the Tigercat can do the job.

Undecided whether to pursue tournament archery or bowhunting? Get a Tigercat. Try your hand at both. See it at your Bear dealer's.

Length: 62" Draw Limit: None
Weights: 20 to 50 lbs. Glass Color: Black
Riser Wood: Assorted Tropical Hardwoods
Specify right-or left-hand and draw weight
Weighed at 28" from front of arrow shelf

Bear Tigercat Bowhunter Set
\$39⁹⁵ \$54⁹⁵

Tigercat bow (40, 45 or 50 lbs.), 6 arrows with 4 Razorheads and 2 target points; 6 auxiliary blades, armguard, bow quiver, shooting glove, target face, and hunting booklet. Individually packaged.

Bearcat

Tigercat

bear cub®

Here's a real "Believe it or not" that surprised us. *The Bear Cub has brought down more deer than any other bow in use today.* And we've been touting it as a beginner's bow!

We've made the 1968 Cub even more of a professional performer. You'll find it easier to draw and with swifter cast. There's more limb recurve and greater stability.

The Bear Cub is the best bow to begin with; your Bear dealer is the best place.

Length: 62"

Weights: 15 to 50 lbs.

Draw Limit: None

Glass Colors: Assorted

Riser Wood: Northern Hardrock Maple

Specify right-or left-hand and draw weight

Weighed at 28" from front of arrow shelf

Bear Cub

\$29⁹⁵

little bear®

This is the small version of the big Bear bow, right down to performance. Little Bear's laminated wood and fiberglass construction features an attractive hardwood handle riser, recurved Bearglas limbs, modified thumb rest and full sight window. Every detail is just like Dad's and Mom's bows. Makes a delightful gift for any youngster.

Length: 48"

Weights: 10 to 20 lbs. in 2 lb. increments

Draw Limit: None

Glass Colors: Assorted

Riser Wood: Assorted Tropical Hardwoods

Specify right-or left-hand and draw weight

Weighed at 24" from front of arrow shelf

Little Bear

\$19⁹⁵

\$34⁹⁵

Cub bow, 4 arrows, R&L tab, armguard, quiver, 16" target face, instruction book. Individually packaged.

Little Bear Set

\$24⁹⁵

Little Bear bow, 6 arrows, quiver, armguard, finger tab, colorful target.

hunting bows

super kodiak®

Imagine yourself looking down your arrow at 650 pounds of grizzly bear. Or bellying across the frozen Alaskan tundra, minutes away from a rendezvous with a massive polar bear.

You'd have to have one heck of a bow to be able to stand up against powerful game like that. A bow that was not only straight-shooting and fast, but one rugged enough to take the punishment of the trail.

The bow you need is the one that's done all this, and more. The Bear Super Kodiak, Fred Bear's personal choice in hunting bows.

The Super Kodiak has evolved from the famous Kodiak design. This is the bow originated and used by Fred Bear to bag more than 100 big game trophies. Special Hi-Compression material forms the slim Super Kodiak silhouette. This year, it's accented with full caps of East Indian Rosewood for a new, rich appearance. A crowned arrow rest and silent arrow plate help to send your shot off whisper quiet.

See the Super Kodiak at your Bear dealer's. It's truly the champion of hunting bows.

Length: 60" and 64"
 Weights: 35 to 70 lbs.
 Draw Limit: None
 Glass Color: Black

\$114⁹⁵ with Premier Hunting sight factory installed

(Fred Bear Hunting Bow Stabilizer may be ordered as original equipment, with Quick-Connect, factory installed, for \$9.95.)

Super Kodiak

super magnum 48

This is the age of specialization. Every field has its specialists and special equipment. Hunting is no exception. While most hunting bows are fine for stalking and shooting from limited cover, it takes a very special kind of bow for cramped shooting situations under heavy cover.

That very special kind of bow is the Bear Super Magnum 48. The "impossible" bow for "impossible" situations.

Super Magnum 48 was designed for close-in shooting. Just 48" long, it's extremely maneuverable and has an

extra rugged finish that takes scrapes and knocks in stride.

Most importantly, the Super Mag delivers. It has a smooth draw, a clean release and shoots flat, straight and fast. It's powerful enough for any game.

Bear Hi-Compression material is used throughout this little demon; perfectly balanced, properly weighted and superbly sculptured.

See the "special" bow that every bowhunter needs at your Bear dealer's. The Super Magnum 48.

Length: 48"
Weights: 35 to 70 lbs.

\$89⁹⁵ (Can be ordered camouflage-painted for \$5.00 additional)

(Fred Bear Hunting Bow Stabilizer may be ordered as original equipment with Quick-Connect, factory installed, for \$9.95.)

Super Magnum

kodiak® magnum

The famous Kodiak Magnum has been redesigned to be a partner in a new hunting combination. A combination that you'll want to own for yourself.

Meet half of bow hunting's new "dynamic duo" . . . the Bear Kodiak Magnum. (The Bear Kodiak Hunter is the other half.)

Since its introduction five years ago, the Kodiak Magnum has enjoyed a popularity no other hunting bow in the world has experienced. Once you've hunted with one it's easy to see why. From the minute you pack the easy-to-store 52" Magnum in your car, to the moment of truth when you let that scor-

ing shot fly, you'll see why thousands swear by the Magnum.

In a tightly-spaced blind or crawling through thick brush, the Kodiak Mag's compactness is a blessing. You can shoot this bow comfortably and accurately from any position: kneeling, standing, crouching, or even sitting.

New this year is a handsome riser of exciting Shedua wood. The dark Forest Green Bearglas, front and back, gives the Mag the look of the woods themselves. There's a new look to the famous Magnum silhouette, too. A longer heel on the handle that not only adds new

beauty but gives a new, surer feel in your hand.

See your Bear dealer and pick a winner—the Kodiak Magnum.

Length: 52"

Kodiak Magnum

Kodiak Hunter

kodiak® hunter

Here's the newest member of bow-hunting's new double play combination, the Bear Kodiak Hunter.

Few bows in Bear's history have been as well received as last year's Kodiak Hunter. Literally an instant success, the Kodiak Hunter is out to win even more converts in 1968.

Now two inches longer (though you'll hardly notice the difference in size), the Hunter has been reworked to make it shoot even faster and smoother. In appearance, it now matches the Kodiak Magnum by retaining the Shedua riser and Forest Green glass of last year's model. The broad limb design of the Hunter marks it as a powerful per-

former; one which you can rely on to pack a punch even at medium and long distance shooting.

See the Kodiak Hunter, part of bow-hunting's hottest twosome, now at your Bear dealer's.

grizzly®

By adding a Grizzly to his gun rack, the avid sportsman can become a two-season hunter. He'll quickly learn there's a whole new season of thrills waiting for him in bowhunting.

He'll find the Grizzly as rugged as any task he puts it to. And powerful enough to drop anything on four legs.

This year, the traditional Grizzly look has been altered by shortening the bow two inches, giving it more zip and maneuverability. The heel of the handle has also been extended to give a more streamlined look and improve the grip. The riser is made of Tigerwood giving the bow a natural camouflaged appearance. Crowned arrow rest and tapered limbs add to the ease and silence of the draw and release.

Best of all, for the novice bowhunter who's just getting his fletching wet, the Grizzly is moderately priced and guaranteed for three years. Check your Bear dealer for the '68 Grizzly.

new fred bear magnum arrows

with interchangeable
points... specially
designed by
Fred Bear!

Fred Bear Magnum Arrows with Converta-Points are the finest of all hunting and field arrows. They are made of a special tough aluminum alloy to Fred Bear's specifications by James D. Easton, and feature Fred's own patented system of interchangeable heads.

Converta-Points are not a conventional screw-in point. Arrow shafts are fitted with a specially-formulated insert material which accepts the threads of the screw-in Converta-Points. The special insert material insures a compressive, shock-resistant fit preventing the point from loosening on impact and eliminating "freeze up" as in the case of metal to metal.

The Converta-Point consists of: (1) a special adapter to fit Razorheads® or heads of your choice; (2) a blunt point matched to Razorhead weight; (3) a field point matched to Razorhead weight; (4) a 75 grain target point as a fourth choice.

With a dozen "Magnums," you're set for big game hunting, small game hunting, field archery, hunting practice, even target shooting! Enjoy them all by changing from single point style to Converta-Points without special tools or techniques.

Fred Bear Magnum Arrows are available in the following tube sizes covering the entire range of hunting and field arrows: .308 for 40/50 lb. bows, .312 for 50/60 lbs., .316 for 60/70 lbs., .320 for 70/80 lbs.

- 1030 Cut to length, fitted with high strength inserts with 6 Razorhead adapters, 6 blunts and 6 field points doz. \$33.95
- 1332 Converta Field Points doz. \$ 1.50
- 1333 Converta Blunt Points doz. \$ 1.50
- 1330 Converta Target Points. doz. \$ 1.50

bear cedar arrows

1040 Bear Top Grade doz. \$14.95

Selected Port Orford Cedar provides the quality shafting for Bear's top grade cedar arrows. Unerring flight and swift cast make them archers' favorites. Spine matched to $\pm 2\frac{1}{2}$ lbs., weight matched to 5 grain tolerances. True helical fletching. (Select clear-dyed feathers on target, select barred feathers on hunting.) Length: 31" maximum to back of head. Choice of yellow, white or olive drab shaft, three color crest.

Bear Top Grade Cedar Arrows for target, field or hunting

- 1040T Target doz. \$14.95
- 1041FL Full length without points. doz. \$13.95

- 1052F or 1053B Field or blunt, 125-grain points doz. \$12.95
- 1054H4 4-blade hunting. doz. \$15.95
- 1055S Set (6 F and 6 H-4) set \$14.95

1060 Bear Standard Grade Cedar Arrows doz. \$9.95

Rugged and inexpensive, Bear Standard Grade Cedar Arrows are designed for the beginner. Spine-matched to within 5 lbs. tolerance. 28, 30 in. lengths only. Shafts color-keyed to arrow weight: 30-40 lbs.—white; 40-50 lbs.—yellow; 50-60 lbs.—olive drab.

- 1060F Field, 40-grain points. doz. \$ 9.95
- 1061FL Full length without points. doz. \$ 9.45
- 1064H4 Four-blade hunting doz. \$14.45
- 1065S Set (6 F and 6 H-4) set \$13.45
- 1066B Flu-Flu box of four \$ 3.95
- 1263B Flu-Flu Bulk Pac ¼ gross \$32.40

Port Orford Cedar Shafts

Parallel Port Orford Cedar shafts, matched for weight and spine. $\frac{1}{16}$ " dia. for 30-35 lbs. only. $\frac{1}{8}$ " dia. 35-55 lbs.; $\frac{1}{4}$ " dia. 55-70 lbs., spined at 28". Specify bow weight and draw length. Shafts are 31".

- 1300 Spine/Weight matched doz. \$ 4.00
- 1301 Spine matched hundred \$16.95 (lots of 100 only)

Tips on sharpening your Bear Razorheads®

Razorheads are factory-sharpened, but should have additional sharpening before being used on game. This is best done with a mill file such as our 3135 or Bear's new 7255 Cutmaster Sharpener. File toward the point and at the original bevel. Finish up by holding the file flat on the bevel at a 90° angle to arrow shaft and take five or six light strokes on both sides of edge. This has the same effect as a butcher's steel in removing burr for best final cutting surface. Do not file main blade to long slender point. A rounded, chisel point (see illustration) will prevent it from curling when striking hard bone.

Point Styles Available

These are the four popular point styles available on Bear Arrows. Type of point is listed under each.

FIELD POINT—125-GRAIN

BLUNT—125-GRAIN

RAZORHEAD®

TARGET POINT

Note: Arrow length is measured from bottom of nock slot to this point:

Selecting Correct Arrows Preferred Method—Method 1

Draw a measuring arrow (marked in inches) in your bow. At full draw, your correct arrow length is the point at which the arrow stops in relation to the front of the arrow shelf. See illustration above.

Alternate Method—Method 2

| Spread Measurement | Arrow length |
|--------------------|--------------|
| 57"-59" | 24"-25" |
| 60"-62" | 25"-26" |
| 63"-65" | 26"-27" |
| 66"-68" | 27"-28" |
| 69"-71" | 28"-29" |
| 72"-74" | 29"-30" |
| 75"-77" | 30"-31" |

bear quivers

handcrafted
and handsome

3206

3220

3180

3170

3175

3210

3215

Bear quivers are made of specially selected top grain leathers. That's why they're able to withstand rugged use and still give the long lasting wear archers have come to expect from Bear leather goods. They are produced exclusively by Bear craftsmen, skilled in the intricacies of leather-working and design. You'll recognize that only hand craftsmanship can produce the fine detailing and consistent quality found in all Bear quivers.

3180 Big Bear Quiver

Top grain black steerhide with smoked elk trim. Big enough for 24 arrows. Three roomy compartments, large zipper pocket, hang-up ring and "totin" thongs included. Easy on-and-off harness. Length 23".

3180 Specify right or left-hand. . . . \$24.95

3170 Western Quiver

Smoked elk and top-grain cowhide combine to form this superbly-crafted quiver. Holds 18 to 20 arrows. Includes easy on-and-off harness, hang-up ring, and thongs for foul-weather gear tie-up.

3170 Specify right or left-hand. . . . \$19.95

3175 Cheyenne Centerback Quiver

Hand stitched quality leather construction throughout. New fast action pack style harness affords perfect individual adjustment and comfort. Roomy accessory pocket. Holds 14-18 arrows easily.

3175 Black. \$15.95

3185 St. Charles Quiver

A Bear exclusive—holds 14 broadheads securely in place, ready for action. Hunter may instantly draw with either hand with a minimum of movement. Antique elkskin hood protects feathers; foam-rubber base keeps broadheads sharp. Chest thong and pack harness distributes weight evenly, comfortably.

3185 (Without accessory pack). . . . \$16.95

3200 (With accessory pack) \$19.95

3190 Accessory pack only (may also be used as belt pack) \$ 3.45

3205 Trophy Quiver

Top grade leather in an eye-appealing design. The Bear Trophy Quiver holds 20 arrows in two compartments without crowding. Big side pocket with zipper. Black, brown, smoked elk, antique or white leather.

3205 Specify right or left-hand. . . . \$11.95

3206 New Trophy Quiver

(Same as 3205) with new embossed black lizard, black alligator and western brown.

3206 Specify right or left-hand. . . . \$12.95

3210 Texan Quiver

Two roomy compartments hold 14-18 arrows. Contrasting color coordination on big zipper pocket and cuff.

3210 Specify right or left-hand. . . . \$12.95

3215 Blackhawk Quiver

Skilfully-tooled front design gives the Blackhawk its unique appearance. Ideal for both novice and expert. Brown with smoked elk trim. 19" length.

3215 Specify right or left-hand. . . . \$ 8.95

3220 Shawnee Quiver

Constructed of rugged Bearhide for inexpensive yet long-lasting use. Holds 10-12 arrows. Brown-tan coordination with quality leather trim.

3220 Specify right or left-hand. . . . \$ 3.95

3225 Tournament Quiver

This fine belt quiver is designed with the tournament archer in mind. Includes arrow divider and two belt straps. Extra-large zippered pocket, score card clip, and pencil holder. Constructed of high-quality leather. Holds 12 arrows. 19" length. Specify right or left-hand.

3225 Black, brown, smoked elk, white or antique \$10.95

3226 New Tournament Quiver

(Same as 3225) with new embossed black lizard, black alligator and western brown.

3226 Specify right or left-hand . . . \$11.95

3226

3230

3235

3240

3245

3250

3255

3185

3261

3291

3310

3295

3300

3305

3230 National Quiver

High-quality, top-grain leather throughout gives this tournament-type belt quiver its home-on-the-range look. Holds 12 arrows comfortably. Includes divider strap and spare string pocket. Colors: Black, brown, smoked elk or white.

3230 Specify right or left-hand . . . \$ 6.95

3240 Sherwood Quiver

Distinctive full suede leather and fringed cuff, yet inexpensively priced. The Sherwood belt quiver holds 10 arrows. Includes belt hook and ring.

3240 \$ 4.95

3235 New Sherwood Quiver

(Same style as 3240 in black vezo skin)

3235 \$ 4.95

3245 Champion Quiver

Tournament-type side quiver of tooled saddle leather. Includes belt hook and ring.

3245 Tan or white \$ 3.95

3250 Mohican Quiver

An inexpensive target quiver made of durable Bearhyde with contrasting leather trim. Holds 8 to 10 arrows. 19½" long. Includes belt hook and ring.

3250 \$ 2.95

3255 Scholar Quiver

Bearhyde-built small belt quiver is perfect for the beginner. Holds 4 to 6 arrows. Has loop for belt.

3255 \$ 1.00

3260 The Talisman

Comfortable, functional, the newest idea in quivers. The Talisman puts to use the best features of both side and hip quivers. Large zipper pocket, pencil holder, arrow separator and tie-down thongs. Belt tunnel on back. Belt clips included. Black, brown, antique or white.

3260 Specify right or left-hand. . . \$10.95

3261 New Talisman

(Same as 3260 above) with new embossed leather black lizard, western brown

3261 Specify right or left-hand. . . \$11.95

3265 Matching belt: Black, brown, white, antique or smoked elk, black lizard, black alligator and western brown, 1" width . \$ 1.95

3275 Matching belt: Black, brown, white, antique or smoked elk, black lizard, black alligator and western brown, 1½" width \$ 3.50

3285 Talisman Hunter

The quick-draw "holster" of archery—fastens to waist and leg; holds six broadheads ready for action. Handstitched antique elkskin with rubber shaft separators and foam rubber inside bottom to protect blades. Snap-close pocket, tie-down leg thong, belt tunnel.

3285 Specify right or left-hand . . . \$11.95

3286 With matching belt (1½" wide). \$14.95

3290 New Talisman Hunter

(Same as 3285) with new embossed leather, western brown.

3290 Specify right or left-hand. . . \$12.95

3291 With matching western brown belt. \$15.95

3295 Custom Hip Pocket Quiver

All black saddle leather with gold trim. Includes divider and outside pocket for string or cigarettes. Length 10"

3295 \$ 4.95

3300 Deluxe Hip Pocket Quiver

Lip prevents wear on trouser pocket. Heavy saddle leather with quick-action flap. 10" long

3300 \$ 2.50

3305 Standard Hip Pocket Quiver

Well-made with top quality saddle leather. Has belt slots and divider. Length 10"

3305 \$ 1.50

3310 The Huntsman

Safely holds and protects six hunting arrows. Rubber shaft separators prevent fletching rub. Broadhead points are held firmly in foam rubber to protect sharp edges. Constructed of rugged saddle leather to conform to body.

3310 \$ 7.95

bear bow quivers

the ultimate in convenience
and fast action
for the bowhunter!

Speed and stealth are the things in bowhunting. And with Fred Bear's own design bow quiver, they're yours! Snaps on and off your bow in a flash. Serves up arrows at a touch. Ample room on the 8-arrow model to carry a full day's load of arrows at your fingertips. If lighter weight is preferred, use the 4-arrow model in combination with a back quiver.

3590 8-Arrow Bow Quiver
made in three sizes: **\$14.95**

3590S (short) fits most hunting bows from 52"-62". Works best on the short Kodiak® Magnum-type bow. (Specify right or left-hand model.)

3590R (regular) fits bows from 60"-64". Works best on medium-length hunting bows such as the Super Kodiak®. (Specify right or left-hand model.)

3590L (long) for hunting bows from 60"-66". Work best on Bearcat®-type bows (Specify right or left-hand model.)

3615 4-Arrow Bow Quiver
in two sizes: **\$12.95**

3615S (short) fits most short hunting bows from 56" down. (Specify right or left-hand model.)

3615R (regular) fits most hunting bows from 54" to 66". (Specify right or left-hand model.)

Plastic-coated bracket wires protect bow finish when mounting or detaching the Fred Bear Bow Quiver. Works quickly, easily and smoothly on a strung bow.

Replacement Parts

- 3595** Front Rubber Point Holder . . . \$ 1.50
- 3600** Rear Rubber Shaft Holder . . . \$ 2.00
- 3605R** Front Bracket, Regular \$ 2.00
- 3605L** Front Bracket, Long \$ 2.00
- 3610R** Rear Bracket, Regular \$ 1.50
- 3610L** Rear Bracket, Long \$ 1.50

(Specify right or left-hand model)

IMPORTANT:

We recommend that when buying a bow quiver, you actually put it on the bow you wish to use it with, to make sure you have the right size.

If the 3590 or the 3615 will not fit the hunting bow of your choice, we suggest you try the 3620 or 3625

Bear Screw-On and Tape-On Bow Quivers

3625 Screw-on Bow Quiver

Threaded brass bushing fits in bow handle. When attaching quiver, a small coin serves as screwdriver. ²¹/₆₄" bushing affects neither bow nor your accuracy. Holds 4 arrows. (Specify right or left-hand model.)

3625 **\$10.95**

3620 Tape-on Bow Quiver

Rigid, two-point mounting tapes onto bow riser. Use ordinary household, adhesive or electrician's tape. Always wax this section of bow before taping. Holds 4 arrows. (Specify right or left-hand model.)

3620 (plastic tape included) **\$10.95**

Replacement Parts

bear makes bowfishing a snap!

3025
\$7.45

3017
\$4.95

7915
\$6.45

Bowfishing is a snap when you're using Fred Bear's Bowfishing Rig. Snaps on and off your bow in seconds. Your bow is protected by the vinyl-coated spring-steel brackets that grip it tightly. Once on, they automatically position the reel in place, ready for action. Spinning-type reel has no moving parts to wear out or replace. Waterproof, too. Solid glass Bear Harpoon Arrow will hold even the fight'n'est fish without snapping.

Bear Bowfishing Outfit

Complete outfit includes bowfishing rig, fiberglass arrow with harpoon head, 50 ft. of 90 lb. test braided nylon line and instruction booklet.

- 3010 Complete (excluding bow) tape-on rig with single-barb point . . . \$ 4.95
- 3015 Same as 3010 except with 3060 easy-off point. \$ 5.45
- 3020 Complete (excluding bow) snap-on rig with single-barb point. (Specify right or left hand, regular or long brackets). \$ 6.95

bear razorheads®

preferred and used by
six out of every 10
pope & young record-holders

A four-blade, razor-sharp broadhead acclaimed as the most lethal hunting head ever developed. Two precision made blades combined. The main blade of mill-tempered spring steel is silver brazed to a one-piece steel ferrule and is long-bevel ground and honed to extreme sharpness. An easily replaceable, lightweight auxiliary blade, also of razor steel, completes the four edge broadhead.

Although the main blade comes from the factory extremely sharp, heads should be further filed or honed to achieve complete effectiveness. Also, after each use the main blade should be filed at the original bevel. Auxiliary blades should be discarded after each hunting shot. However, they can be sharpened at camp by first using a medium stone to bring up the edge then honing with a very fine stone. (See page 17)

Fred Bear Razorheads

One dozen Fred Bear single-blade Razorheads plus one dozen razor-auxiliary blades and slot cleaning tool. In handy protective "skin pack." H-4 doz. \$ 5.95

Auxiliary Blades

Extra blades for the H-4 Razorhead. One dozen per package. Weight 10 grains each. H-A doz. \$ 1.25

bear bow cases

3500 Transport or store your bow in style and safety. Bow nestles amid a soft, deep pile lining. Long zipper closure keeps out dust and dirt. Extra fine, extra soft leather-grained expanded vinyl finish. Roomy zipper-closed accessories pocket. Available in olive green, tangerine, snow white and black. 8" width. 52", 60", 66" and 72" lengths **\$15.95**

3505 A fleecy nap double-lining protects your bow in this rich, expanded vinyl case. Reinforced stitching at wear points assures added years of use. Leather grained exterior colors: olive green, tangerine, snow white and black. 8" width. Reinforced handle and extra-long zippered closure. 52", 60", 66" and 72" lengths **\$9.95**

3510 The rich-looking leather grained vinyl exterior of this case belies its low price. Quality features include carrying handle and reinforced stitching for longer service. 6¾" wide. Select from olive green, tangerine, snow white and black. 52", 60", 66" and 72" lengths. **\$4.95**

omni-coupler and stabilizers

New Bear Omni-Coupler

The newest, and most advanced, development in stabilizers, the Bear Omni-Coupler improves shooting accuracy and consistency by allowing the bow to move at the "moment of paradox" during the shooting sequence. But while the bow is moving, the new lightweight tubular rod and weighted head of the Omni-Coupler remain relatively stationary! This gives your arrow a truer flight, greatly improving accuracy.

The Bear Omni-Coupler counteracts the shock and vibration of the bow limbs after the arrow is released, creating faster dampening action and that s-m-o-o-t-h feel found only on a Bear bow.

The Bear Omni-Coupler consists of two interchangeable compressible bushings of different densities, two interchangeable heads of different weights and a lightweight tubular rod. You can select the right combination of all these elements that will best complement your own personal shooting style.

- 7311** Bear Omni-Coupler with 2 interchangeable compressible bushings **\$14.95**
- 7310** Bear Omni-Coupler complete with tubular rod and two weighted heads in carrying case **\$24.95**

New Bear Hunting Stabilizer

The first hunting stabilizer ever offered to bow-hunters. A compact unit consisting of a chrome-plated weighted head and a built-in flexible coupler. The entire unit is just 3½" long and comes in its own camouflaged case for use in eliminating glare and reflections when hunting.

The Bear Hunting Stabilizer offers you: (1) greater accuracy; (2) reduced string noise; (3) less bow movement; (4) better arrow clearance; (5) improved "feel."

- 7320** Bear Hunting Stabilizer with case **\$ 9.95**
(May be ordered installed on any new 1968 Bear Hunting Bow for only \$9.95 additional. No charge for installation.)

Bear Inertial Stabilizers

Attach a Bear Inertial Stabilizer to any Bear Target-Tournament bow for vibration-free shooting. The stabilizer's delayed vibrations offset the natural vibrations of the bow to give you smoother, more accurate shots. Its mass weight provides additional static stability while holding and releasing each draw.

Set contains two chrome plated aluminum rods in 14" and 22" lengths with two interchangeable stainless steel weighted heads.

- 7300** Set of two, with case **\$19.95**

gloves, tabs, armguards and slings

bowsights and accessories

Fred Bear Premier Bowsight

6050 \$19.95
 First and only bowsight custom designed to become an integral part of your bow. With the Fred Bear Premier Bowsight, you can instantly set both elevation and windage compensation—puts you on target for every shot. The Adjustable Nylon Arrow Plate allows you to tune your bow to the spine of the arrows used and to your individual style of shooting. A wide choice of accessory apertures and arrow rests are available. Available in both 5" and 7" lengths. The 6170 Standard Post and 6200 Bristle Rest are standard equipment. (See Optional Accessories, this page.)

Bear Premier Hunting Sight

6075 \$19.95
 In choosing a bowsight for hunting, you'll naturally want the finest—the Bear Premier Hunting Sight. This precision-made sight is designed to become an integral part of your Bear hunting bow. It's built right into your bow to fit perfectly. The 5" Premier Hunting Sight features a 6200 Bristle Rest, and Adjustable Nylon Arrow Plate, for proper tuning of arrows, and three fluorescent rings—mounted one above the other. You preset a different yardage into each of these rings. This prepares you to shoot from three known distances without having to adjust your sight. Various accessory apertures and rests, as well as additional fluorescent ring assemblies (6245) may be used. (See Optional Accessories, this page.)

Replacement Parts

Replacement parts for the Bear Bowsights and Premier Arrow Rest are available from your local authorized Bear Dealer or from Bear Archery Company, Rural Route One, Grayling, Michigan 49738.

Bear Premier Arrow Rest

6255 \$ 3.75
 "Tune" your bow to your arrows and to your style of shooting with the Bear Premier Arrow Rest. This attractive combination bristle rest and nylon arrow plate will fit any bow—give it a distinctive appearance. Easily adjustable, the rest comes with complete instructions for installing. A large selection of rests are also available. (See Optional Accessories, this page.)

Bear Optional Accessories

The following items are available for Bear Bowsights and, where applicable, for the Bear Premier Arrow Rest.

- 6165** Peep Sight \$.50
- 6170** Standard Post \$.50
- 6175** Fluorescent Dot Post \$ 1.50

- 6125** Slide Receiver Assembly (for 6110) \$ 4.45
- 6265** Cross Hair Aperture \$ 1.50
- 6245** Hunting Aperture and slide assembly. \$ 3.25

Bear Scor-Mor Sight

Anodized metal parts with plastic-to-metal design assures the smoothest-adjusting sight available. End mounting brackets and center slide molded of high-impact, non-breakable polyethylene. Can be taped or screwed on. Removable end caps permit cutting sight bar to fit any bow.

- 7555** Target with plain lens \$ 3.95
- 7556** Target with ball sight. \$ 2.50
- 7557** Field with hood and post \$ 3.95
- 7558** Hunter with 3-ball sight \$ 3.95
- 7559** Peep sight \$ 3.95

Victor Prisms

Fits SCOR MOR, Reynolds, and others. Degree angles: 0°, 4°, 8°, 12°. The greater the prism angle, the greater the yardage at which you can sight directly on the target.

- 7620** (Specify 4°, 8° or 12°) \$ 6.75
- 7621** 0° Clear Prism \$ 5.95
- 7622** Neo-Chrome Prism. 0° only \$ 5.95

Victor Hooded Prism

Black hood eliminates glare and reflections. Has permanently-marked cross hairs.

- Will fit any sight using prisms.
- 7623** (Specify degree) \$ 7.50

Action Sight Apertures

Multi-styled high-quality apertures, with or without spirit levels. All sight mounting wires are chrome-plated and permanently installed. Individually packaged in clear plastic boxes.

Cross-Hair Apertures

- 7625** Small cross hair in 3/8" dia. hood with spirit level. \$ 2.50
- 7626** Large cross hair in 3/8" dia. hood with spirit level. \$ 2.50
- 7627** Small cross hair in 3/8" dia. hood \$ 1.50
- 7628** Large cross hair in 5/8" dia. hood \$ 1.50

Peep Apertures

- 7629** 1/16" peep sight with spirit level. \$ 2.50
- 7630** 1/8" peep sight with spirit level. \$ 2.50
- 7631** 3/16" peep sight with spirit level. \$ 2.50
- 7632** 1/16" peep sight in 3/8" dia. hood. \$ 1.50
- 7633** 1/8" peep sight in 3/8" dia. hood. \$ 1.50
- 7634** 3/16" peep sight in 3/8" dia. hood. \$ 1.50

Fluorescent Dot Post Apertures

- 7635** Fluorescent dot post sight in 3/8" dia. hood with spirit level. \$ 2.95
- 7636** Same as 7635 without spirit level \$ 1.95

Ring Sight

- 7637** Ring sight in 5/8" dia. hood with spirit level \$ 2.95

Pendulum Bow Sights

A weighted pendulum forms a cross hair for sighting, while indicating any cant in the bow.

- 7638** 3/16" wire ring on peep pendulum which centers on cross hair dot \$ 3.95

Reynolds Removable Double Adjustable Bowsight

Elevation adjustment 10 to 100 yards. Sight accepts prism, pins or double-wire apertures. Vertical adjustment for further compensation on "heavy" days. (We suggest use of two sight bars, one calibrated in yards, one in meters for FITA Rounds.)

- 7600** \$ 8.75
- 7601** Gold anodized sight base only \$ 3.00 (also accepts 7900 Bowfishing Reel)

New Champion Sight Extension

Fits the Reynolds Adjustable bow sights. With a Champion extension, you get a clearer sight picture, finer aiming, less critical sight adjustment. The extension also compensates for bow hand torque.

- 7615** \$ 7.95

bowsights, targets and faces

New B&R Bubble Sights

Fine quality B&R sights feature dot post sight with spirit levels sealed in shockproof clear plastic. Five sizes fit most popular sight bars. Each come individually packaged in clear plastic box.

- 7540 1 1/2" mount fits Bear Scor-Mor, Reynolds, eight other two-pin sights \$ 5.95
- 7541 1 1/4" mount fit D-J thread and pin sight \$ 5.95
- 7542 6/32 screw \$ 5.95
- 7543 8/32 screw fits Reynolds and others \$ 5.95
- 7544 Fits Bear Premier Bowsights . . \$ 4.95

New Perkins Range Ring Bowsight

You can overcome the difficulty of estimating distances in the field. The four fluorescent painted rings are sized to determine range automatically. Mounts easily.

- 7590 \$ 6.95

Hunt Mate Hunting Bowsight

Improve your chances of bagging a buck! With the new Hunt Mate, you can preset four distances. The four independent heads lock into adjustment; won't work off. They're conveniently color-coded with easily seen fluorescent dots. Special mount bracket quickly tapes on any bow.

- 7730 \$ 4.95

Vee Hunting Bow Sight

This easy to use sight adjusts to any bow. Combines aiming with triangulation for correct elevation and quick shooting. Brass thumb locks, antique black bar, rigid white vinyl pressure ridge. State choice of 2 3/4" white or fluorescent orange "V".

- 7676 6" bar (as shown) . . . \$ 5.45
- 7677 7" bar . . . \$ 5.55
- 7678 8" bar . . . \$ 5.65

Leupold M1 Optical Bowsight

A precision optical sight which works just like an expensive camera viewfinder. A fluorescent aiming pattern is superimposed inside the lens. All you do is match it up with your target. Four styles of interchangeable range-finder reticles are available. May be mounted onto Bear Premier Bowsight without drilling or tapping. Accurate adjustment 20 to 60 yards. Specify right or left hand.

- 7705 \$39.95

String Peep Sight

Attaches to string; serves as rear sight to align arrow on target. Unbreakable hard vinyl. Weatherproof. 18 on display card.

- 7670 Single hole . . \$.75
- 7671 Double hole . . \$.75

Saunders Hood Level

Fits any 3/8" bowsight hood.

- 7580 \$.98

Precision-Pak Target

Revolutionary square design gives 27% more shooting area than round target of comparable size. New polyethylene covered targets have double-reinforced center section. Wood fibers hold arrow and are self-healing. Easy to store, stack, stand up or carry. The Precision-Pak Olympic. The toughest target available to archers today, Precision-Pak is less expensive than comparable round targets.

Top Quality Bear Bowstrings

Bear guarantees these bowstrings to be the finest made. Only extra strong double-loop Dacron strings are used and each is laid by hand rubbing. Custom made Bear bowstrings are sized to fit every bow from 10 to 80 lbs; 48" to 72" in length. "String length" pertains to bow length; this is the distance between the nocks, following the curve of the limb, usually marked on the side of the bow.

New Fred Bear Professional Bowstrings

Smart plastic carrying case marks the new professional bowstring. Extra strong double-loop black Dacron strings have full monofilament servings and loops. Hand rubbed strands in custom made sizes for bow weights 25/35, (10 strands) and 35/45, (12 strands); lengths 66", 69" and 72" only

- 7105 ea. \$ 3.95

Bear Temper Strand Bowstrings

Hand rubbed, double-loop Dacron strings with full nylon servings. Sizes for every bow weight from 10 to 80 lbs. in the following lengths: 48", 52", 54", 56", 58", 60", 62", 63", 64", 66", 68", 69", 70", 72".

- 7100 ea. \$ 1.50

Bowstring Chart

7100 Strings (all lengths) are made in 6 bow weights, listed here with the number of strands of 1100/2 Dacron "B" used:

| | | | |
|-----------------------|----|--------------------|----|
| Up to 25 lbs. | 8 | 45-55 lbs. | 14 |
| 25-35 lbs. | 10 | 55-65 lbs. | 16 |
| 35-45 lbs. | 12 | 65-80 lbs. | 18 |

(Dealer note: Shipped four sets to a carton only.)

Blue Fox Set

Young archers to age 6. Set includes a 42" bow, three cedar-shafted arrows (with target points), three colorful target faces, quiver, bowstring and "Fun with Bow and Arrow" booklet \$ 5.95
(Dealer note: Shipped four sets to a carton only.)

Fox Arrows

Fox 1240T Arrows

Spine-selected cedar target arrows with full-color shaft—silver, blue and yellow—and assorted colorful feathers. In lengths of 24", 26" and 28" only. Diagonal fletch. (Dealer display carton of 144: 24-24"; 48-26"; and 72-28"; or all in one length)

1240T Target Points . . . per gross \$60.00

Fox 1280F Arrows

Selected cedar arrows with field points. Full-color shaft—Chinese red, white or gold with contrasting two-color crest. 2 1/4" diameter. Three clear feathers. (Dealer display carton in same quantities as 1240T)

1280F Field Point . . . per gross \$85.00

how to take care of your bow

Take care of your bow . . . while not in use, keep your bow unstrung. Hang it vertically or lay it across pegs supporting both limbs. Keep it in a bow case in a cool, dry spot.

When used in rain or snow, wipe dry before storing. In cold weather, flex bow several times to "warm it up." Occasionally, apply a light coat of furniture wax to protect finish.

To measure brace height (fistmele), measure at right angles to the string from the deepest cut in the handle on the face of the bow, below the arrow shelf.

The proper brace height for your bow (and for you) depends almost entirely on your shooting style and the conditions under which you are shooting. The string supplied with your Bear bow is exactly the right size to give your bow best performance. However there is no "set" brace height which will give you maximum performance every time. For example, as your bow "warms up" during a shooting session, any string will tend to stretch a bit. After a period of disuse, the string will return to its original length. For this reason alone, it is important that you "tune" your bowstring to your bow before (and sometimes during) each shooting session, bracing the bow at the brace height will give you:

1. Least wrist slap
2. Least string noise and vibration when shooting.
3. An arrow that does not wobble in flight.

Your brace height will never need to be lower than that provided by a fresh Bear bowstring, placed on the bow without twisting. To increase brace height, simply twist the string to shorten the length.

Stringing your Recurved Bows

Place bow handle under thigh, lower tip across front of opposite ankle. Raise heel to keep tip off ground. Apply pressure against recurve, not bow tip. Slip upper loop into nock, while watching string alignment on lower recurve.

Or . . . use the new Bow-Pal Bowstringer. Just stand on the cord after attaching it to your bow. The bow tips bend as you pull up—ready for easy, safe stringing. For more information on the Bow-Pal Bowstringer, see page 27.

archery films in color and sound

Here's something for every archer, bowhunter—all who enjoy the outdoors—in these rare and exclusive sound-color films. Never before have you been able to obtain such a thrill-packed collection of motion pictures for your community.

These are a few groups that will welcome these films:

- Sportsmen's Clubs
- Archery Clubs
- Service Clubs
- Church Groups
- Boy and Girl Scout Troops
- Sport Shows
- Schools
- Open Houses
- Banquets
- Camps

Average running time of these films is 15 minutes, making them ideal for club programming. Order two for a half-hour show. Rental fee is \$5.00 each. Check or money order must accompany request. We pay postage both ways. Reservations should be made one month in advance. Write: Grayling Film Service, Grayling, Michigan 49738.

1. **Kaibab Bucks** Exciting first bowhunt season in Arizona's Kaibab Forest.
 2. **Trophy Elk** Off to Wyoming's Rockies with a bow in quest of royal elk.
 3. **Backcountry Bowhunt** Going after North America's biggest game.
 4. **Prairie Pronghorn** Bowhunting wary antelope on the Western plains.
 5. **Badland Bucks** Skilled bowhunters outwit mule deer in North Dakota.
 6. **North to Adventure** Record Stone sheep hunt in Canada.
 7. **Bowhunter's Safari** Fred Bear hunts in French Equatorial Africa.
 8. **Bowfishing Fun** Introduction to archery's fast-growing off-season sport.
 9. **The Art of Archery** Basic instruction by experts on how to shoot.
 10. **The Oldest Game** Thrilling pursuit of the wily white-tail deer.
 11. **B'wana Bowman** Amazing story of elephant hunt in Africa's Congo.
 12. **Arrow for a Grizzly** Bowhunter meets Grizzly in the Yukon wilds.
 13. **Grubstake Bowhunt** Stalking beautiful Dall sheep in Alaska.
 14. **ABC Television's American Sportsman Grizzly Hunt** Featuring Fred Bear.
 15. **Land of the Tiger** Fred Bear's successful search for the great Bengal tiger in exotic India.
 16. **Kodiak Country** Breathtaking hunt of the huge Kodiak bear in Alaska.
 17. **Fins, Feathers & Fur** The fast action of "off-season" sports for the bowman—bowfishing for the stingray and alligator gar, hunting for the bob cat and pheasant.

 19. **ABC Television's American Sportsman** Fred Bear in his first successful attempt at a polar bear in Alaska. Part two an exciting stalk of a big buck mule deer in New Mexico. †(Note: cannot be used for television or paid audiences.)
 20. **The Year of the Cape Buffalo** Fred Bear and professional hunter Wally Johnson successfully go after Africa's meanest game: the Cape Buffalo. Filmed in Mozambique.
- *In two parts—12½ minutes each, on one reel. \$10.00 per reel. Write us about films for television use.

How to Order A Bear Bow

Tell your Bear dealer your height, weight, age, whether you are right or left-handed, and whether you want tackle for hunting, target, or both. If no dealer is nearby, write us.

Prices are f.o.b. Grayling, and subject to change without notice. Minimum order \$5.00 (Michigan residents only: if you send check with order, allow for 4% sales tax.) Dealers are requested to use Bear order blanks whenever possible.

Important: Normal Parcel Post restrictions do not apply to parcels being shipped to a RFD address. These packages may weigh up to 70 lbs. and have a maximum size of 100" (length plus girth).

bear guarantee

For Those Who Want the Finest

Every Bear Bow is numbered and accompanied by a registration card which must be filled out and mailed by the purchaser or his Bear Dealer within 10 days after date of purchase. Should failure occur in a bow so registered within a period of 6 months after date of purchase, the Bear Archery Company will make free repair, or replacement if repair is not feasible, unless the bow shows evidence of misuse or improper handling. The bow serial number must be intact.

After 6 months and up to one year after the purchase date and provided the bow has not been mis-used or mishandled, repair or replacement will be made for 25% of the list purchase price. From one year to 1½ years after purchase date, the charge will be 50% of the purchase price. From 1½ to 3 years the charge will be 75% of the purchase price.

No adjustment will be made until the damaged bow is returned to our factory for inspection. Replacement will be made with a bow of the same model and weight, as near as possible. This guarantee is valid only when purchase has been made through an Authorized Bear Dealer. Dealers are not authorized to make adjustments, but they will be glad to handle the shipping and correspondence for you.

This warranty is transferable from one owner to another, provided bow is registered at time of purchase by original owner.
