Community Needs Assessment: Results

The first step in developing an effective substance use and misuse reduction plan is to assess your community. A community assessment tells you about your community's readiness to implement prevention, treatment, and justice-related programs to address substance use and misuse. An assessment also provides an overview of the risk and protective factors present in the community, helping your coalition plan more effectively.

Community Risk and Protective Factors

Use the list of risk and protective factors to identify those present in your community. Identify the resources/assets and limitations/gaps that exist in your community related to each. The lists are not all-inclusive and others may apply.

Risk Factors Examples: trauma and toxic stressors; poverty violence; neighborhood characteristics; low neighborhood attachment; community disorganization; community norms and laws favorable toward drug use, firearms, and crime; availability of alcohol and other drugs; weak family relationships; family substance use; peer substance use; mental health problems; families moving frequently from home to home; limited prevention and recovery resources.

Protective Factors Examples: strong family relationships; neighborhood economic viability; low childhood stress; access to health care; access to mental health care; community-based interventions; restricted access to alcohol and other drugs including restrictive laws and excise taxes; safe, supportive, and connected neighborhoods; meaningful youth engagement opportunities; local policies and practices that support healthy norms and child-youth programs; positive connection to adults.¹

Making A Community Action Plan

Now that you have completed a community assessment and have identified the risk and protective factors that exist, you can develop a plan of action. The Comprehensive Community Plan (CCP) is a systematic and community-driven gathering, analysis, and reporting of community-level indicators for the purpose of identifying and addressing local substance use problems.

Step 1: Create problem statements, and ensure problems statements are in line with statutory requirements

Step 2: Ensure your problem statements are evidence-informed, then prioritize

Step 3: Brainstorm what can be done about each

Step 4: Prioritize your list, and develop SMART goal statements for each

Step 5: List the steps to achieve each goal

Step 1: Create + Categorize Problem Statements

Create problem statements as they relate to each of the identified risk factors.

Risk Factors	Problem Statement(s)
1. Family substance use	<ol style="list-style-type: none">1. Alcohol abuse by adults is a problem within the county.2. Drug use by adults is a problem within the county.3. Alcohol- and drug-related offenses among adults are a problem within the county.
2. Peer substance use	<ol style="list-style-type: none">1. Alcohol use and abuse by youth is a problem within the county.2. Drug use by youth is a problem within the county.3. Alcohol- and drug-related offenses among youth are a problem within the county.
3. Availability of alcohol and other drugs	<ol style="list-style-type: none">1. The ease of obtaining alcohol and other drugs is a problem within the county.2. Lack of parental awareness of the availability of alcohol and other drugs in the county is a problem.3. Parents or other adults providing or allowing alcohol consumption is a problem within the county.

Step 2: Evidence-Informed Problem Statements

Identify your top three problem statements using local or state data. Ensure that there is a problem statement for each co-equal funding category (e.g., prevention/education; intervention/treatment; and criminal justice services and activities).

Problem Statements	Data That Establishes Problem	Data Source
<p>1. Step 3: Brainstorm

Consider the resources/assets and limitations/gaps that were identified for each risk factor, and list what actions can be taken for each identified problem statement.

Problem Statements	What can be done (action)?
1. Alcohol, tobacco, and drug use by youth in the county is a problem.	<ol style="list-style-type: none"> 1. Support prevention programs/initiatives that have the potential to reduce alcohol, tobacco, and drug use by youth. 2. Support law enforcement and judicial initiatives that address underage drinking, tobacco, and youth drug use. 3. Promote and support treatment services for youth.
2. Alcohol abuse and drug use by adults in the county is a problem.	<ol style="list-style-type: none"> 1. Support education initiatives that have the potential to reduce alcohol abuse and drug use by adults. 2. Provide awareness of treatment and recovery options in Adams County. 3. Promote and support treatment services and recovery groups for adults.
3. Alcohol and drug offenses committed by youth and adults are a problem.	<ol style="list-style-type: none"> 1. Support existing and new programs/initiatives that have the potential to reduce alcohol and drug offenses. 2. Support law enforcement and judicial initiatives that address drug and alcohol offenses among youth and adults.

	3. Promote and support treatment services and recovery groups for youth and adults.

Step 4: Develop SMART Goal Statements

For each problem statement, prioritize your list of what can be done. Choose your top two actions for each. Then, develop goal statements that demonstrate what change you hope to achieve and by when you hope to achieve it.

Problem Statement #1	
Goal 1: Reduce the percentage of alcohol- and drug-related referrals to Juvenile Probation (15%) by 1%, as reported by Juvenile Probation, within a one-year period.	
Goal 2: Reduce the number of minors arrested for consuming or possessing alcohol (26) by 1% within a one-year period, as reported by Adams Superior Court.	
Problem Statement #2	
Goal 1: Decrease the number of positive tests confirmed by the lab for Probation (767 in 2020) by 2% within a one-year period, as reported by Probation.	
Goal 2: Increase the number of visits to Adams Behavioral Health by those with substance use disorders (779 in 2020) by 1% within a one-year period, as reported by Adams Behavioral Health.	
Problem Statement #3	
Goal 1: Reduce the number of OWI charges (255 in 2020) by 1% within a one-year period, as reported by Adams County Courts.	
Goal 2: Reduce the percentage of cases related to substances (49% in 2020) by 1% within a one-year period as reported by Adams County Courts.	

Step 5: Plans to Achieve Goals

For each goal, list the steps required to achieve each

Problem Statement #1	Steps
Goal 1: Reduce the percentage of alcohol- and drug-related referrals to Juvenile Probation (15% in 2020) by 1%, as reported by Juvenile Probation, within a one-year period.	<ol style="list-style-type: none"> 1.
