

ACCIDENT PREVENTION

360 DEGREE CHECKS

360 DEGREE CHECKS PRIOR TO ANY VEHICLE MOVEMENT

To All Drivers

It is easy to forget yourself or become distracted while carrying out your daily work duties at the start of your shift or after you've finished a break / parked up. With all sorts of distractions, lapses of concentration, accidents / incidents occur, some worse than others. It is important that you carry out a 360 degree walk round check of your vehicle before setting off after being parked up. You may have forgotten how close you were to stationary objects or other vehicles. Also, surroundings change all the time.

An accident occurs when the vehicle has started to move and a third party has parked to close or we have parked to close to a post or object and therefore have no visibility of the surrounding area.

It is imperative that all drivers take reasonable care prior to any movement being made. Our aim is to reduce the level of liability by instructing all drivers to carry out a 360 degree walk around prior to any movement being made, and at any time when your visibility becomes restricted **especially when reversing**. It is important that we implement this new process to reduce the amount of accidents / incidents.

It is the driver's responsibility to ensure that they complete the walk around at every occasion when a vehicle has been stationary for a period of time.

Do you know your surroundings?

**I, the undersigned hereby acknowledge that I have received and understood the above instruction in the 360 degree checks.
I agree to adhere to these instructions at all times.**
