

Get Serious About Disaster Restoration Ultrasonic Contents Cleaning

Any Size • Any Feature • SAFETY FIRST

Hessonnic Ultrasonics has over forty years of ultrasonic systems engineering, design, and manufacturing experience. We're not just another company that puts our name on someone else's product. One size or design does not fit all needs. We have designed and built machines and systems for many specific applications. Let us build specifically what you need for disaster restoration contents cleaning. Our quality is in the design, engineering and manufacturing, using only first quality materials, ultrasonic, electrical, mechanical and pneumatic components. Our optional pneumatic lift is the best in the business.

Features

- Ultrasonic Systems Designed by our Engineer
