

## Katie Moriarty, Ph.D.

Dr Katie Moriarty is a Senior Research Scientist, Forest Wildlife Ecologist for the National Council for Air and Stream Improvement (NCASI). Katie's research interests include balancing needs of sensitive wildlife species, sustainable forestry, and biodiversity. Katie's current projects ranging from evaluating marten and fisher movement through managed landscapes to evaluating biodiversity (e.g., pollinators, carabid beetles, mammals) broadly in watersheds that differ in age and composition. Katie is active within The Wildlife Society and International *Martes* Working Group.
