

# The LBS (Low Bees Stress) Method Package Installation on Drawn Comb

Tony Rimkus [www.olddrone.net](http://www.olddrone.net)

## Be Prepared:

- Package Box
- Bee Brush
- Hive Tools
- Magnet
- Spray Bottle with Sugar Water
- Rubber Bands
- 2 blocks of wood
- Thin Nail

1. Remove 2 frames of drawn comb of honey
2. Cut out a rectangle on each of the frames, large enough for queen cage to rest in.
3. Spray bees lightly with sugar-water
4. Rap box on ground to dislodge bees from top of container
5. Remove plywood from top of package box
6. Use Magnet to remove metal container
7. Remove Queen cage
8. Put plywood back on top of package box to keep bees inside

1. Remove cork from candy end of queen cage
2. Use nail to pierce a hole part-way through candy
3. Place queen cage into cut-out on frame.
4. Push frames together

Top down view

1. Put frame with queen cage attached back into the middle of the frames. Insert remaining frame on outside.

1. Put wood blocks to the side, near the queen cage
2. Remove lid from package
3. Place upside down on top of blocks
4. Close up hive.
5. Remove package box within 24 hours
6. Check queen cage in 3 days. If empty, remove. If queen is still in cage, enlarge hole and check back in 2 days. Remove cage
