

From the Ashes Film Screening

On Wednesday, July 11, The Havre de Grace Maritime Museum hosted *From the Ashes* – a film screening - presented as part of the monthly Environmental Film Series, a partnership between the Havre de Grace Green Team and the Havre de Grace Maritime Museum.

This film captures Americans in communities across the country as they wrestle with the legacy of the coal industry and what its future should be under the Trump administration. From Appalachia to the West's Powder River Basin, the film goes beyond the rhetoric of the “war on coal” to present compelling and often heartbreaking stories about what is at stake for our economy, health and climate.

Per Jean Johnson, the facilitator for this event, the response to the screening of this film was pretty dramatic as it is a stunning production with much information and “heart” about coal and coal workers. Following the screening, there were lots of comments and suggestions regarding a real concern about what each individual person can do. Participants shared their experiences installing renewable solar in their homes. Harford County Climate Action members were in attendance and talked about neighborhood solar options, one of many ways to move away from fossil fuels in your own home. Please see our Calendar of Events for more on our Environmental Film Series in the months of August through December.
