Why now? FSMA importer regulations became effective 5/30/17. Owners or consignees of food at the time of entry must assess the hazards in the imported food

Course Description: Learn requirements to comply with the FDA Foreign Supplier Verification Program. At the conclusion of this workshop, participants will have the knowledge and tools to:

- ✓ Understand the purpose of the Foreign Supplier Verification Program (FSVP) rule
- ✓ Identify what to include in your FSVP
- ✓ Design, develop, and implement your FSVP
- ✓ Implement a compliant recordkeeping system
- ✓ Understand FDA's role in the FSVP

This course is designed for:

- U.S.-based food processors who meet the definition of “importer” in the FSVP rule. This includes those who own or are the consignee of food at the time of entry, or, if no owner or consignee exists, the U.S. agent or representative of the foreign owner.
- Others who have an interest in ensuring that the requirements of the FSVP rule are met, including brokers, exporters, foreign suppliers of food exported to the U.S., business owners who currently buy food from foreign sources, and representatives of foreign governments.

About us: Our company was formed in 2016 to deliver the training needed to implement FSMA and build a food safety culture in the feed industry. Our instructors deliver the courses monthly and have the experience to answer your questions.

Please reserve your own hotel room. We have not established a room block for students.

Class will be in: [Monarch Hotel](#) 12566 SE 93rd Ave, Clackamas, Oregon 97015
