

# FRACKING in the Marcellus Shale

The public is invited to attend a presentation on the issues of Water Usage, Contamination & Disposal

Wednesday, September 29 2010  
from 6pm-8pm

Penn State Fayette Campus,  
Williams Bldg - Swimmer Hall

Dr. Conrad Voltz an Assistant Professor & Director & Principal Investigator for the Center for Healthy Environments & Communities at the University of Pittsburgh will discuss water and air environmental health impacts of Shale Gas extraction & will present FracTracker, a website created to help citizens track impacts of Marcellus Shale gas extraction activities.

Atlas Energy (appearance confirmed/name not provided) will discuss impacts of fracking, water consumption and disposal methods, specifically as it relates to the process on wells drilled and water disposal methods in Fayette County.

David Yoxtheimer, Hydrogeologist/Extension Associate at Penn State's Marcellus Shale Outreach & Research Center will discuss Water Resource Management for the Marcellus Shale Natural Gas Development.

Hosted by the Marcellus Shale Task Force - Fayette County
