ISA (D) – PNID-INDIA-2011

PNID-INDIA is an initiative taken by ISA-Delhi section to provide a common platform to all stakeholders of Instrumentation and automation solutions providers. This forum aims at sustainable development of measurements, control, safety & automation solutions in Oil & Gas sector.

Vision

To take instrumentation in Indian Petroleum sector to global heights and acquire a state-of-the-art instrumentation technology

Mission

To engage all petroleum sectors in adopting the latest standards in instrumentation and automation, there by increasing efficiency and productivity.

To realize the above vision and to execute the mission, the various long term and short term activities being carried out by

PNID-INDIA are:

- Enabling knowledge sharing among Petroleum, Oil & Natural Gas sectors instrumentation & automation fraternity including End users, EPC companies/ consultants, suppliers and academicians.
- Facilitate through integrated automation, the realization of a world class Petroleum, Oil & Gas plants in India, setting and sustaining higher bench marks for safety, cost and environment.
- Integrate Indian Petroleum, Oil & natural Gas sector to global developments in Control & Automation there by setting up local vision with global approach.
- Provide an interface for the automation fraternity with the statutory bodies, policy makers and regulators

The engagement and involvement of various End users, EPC companies and suppliers including technology providers and developers would certainly help in achieving the roadmap for implementing strategies and best engineering practices for level-4 automation so essential for a world-class Petroleum Oil & Gas sector.

We are now launching PNID-INDIA-2011 at New Delhi, being held in September 2011. The symposium would seek to enlarge the engagement of various relevant industry segments; a pioneering attempt on sharing the cross-domain knowledge of critical automation areas.

One day programme with event theme as “Instrumentation & Automation –Supplying fuel, Sustaining happiness” is being planned to satiate the ever-increasing demand of knowledge sharing among automation professionals of Petroleum, Oil and Natural gas industry.

ABOUT ISA & ISA Delhi Section

ISA (The International Society of Automation) is a global society of more than 40,000 C&I and automation professionals, working through 14 districts and hundreds of sections worldwide, with its headquarters in North Carolina, USA.

ISA has been involved in promoting emerging technologies across the globe by a variety of ways such as:

- Writing standards for new technologies like Field Bus, Wireless, Manufacturing execution systems, packages etc.;
- Publications on a huge variety of subjects, magazines like Intech;
- Training seminars/workshops, webinars etc.;
- Certification programs for technicians, engineers and senior professionals.

Exhibitions like ISA-Expo held regularly in the USA. Through various honours and awards, ISA recognizes the talented and the dedicated professionals every year during its annual get together. Interaction with Student members, formation of student section and annual scholarships, competitions etc. are many interesting student programs of the ISA.

ISA Delhi Section has been formed almost a decade back and has progressed well since then with a membership of more than 325 and growing. ISA Delhi Section had taken many initiatives in the past including organizing two exhibitions ISA (D) EXPO' 05& '07, a large number of seminars and workshops on emerging technologies. A body has been constituted for promoting the systems integration concept in India.

Some of the recent initiatives have been

- Formation of POWID- India (Power Industry Division), a pan India body to promote awareness of emerging issues, concerns and technologies in power plants.
- Formation of systems Integrators forum to share the knowledge base, vast scattered resources of systems integrator community.
- Forum for Interaction with academics and education, to bring together the Industry and Institutions.
