EMPLOYMENT

WorkAbility 1
A California Transition Program

The WorkAbility Program provides comprehensive pre-employment skills training, employment placement and follow-up for high school students in special education who are making the transition from school to work, independent living and post secondary education or training. The program offers special education students the opportunity to complete their secondary education while also obtaining marketable job skills at employment sites offered by employers in the local business community.

Who is eligible for WorkAbility1 Services?

Students who receive Special Education services in high school up to age 22 are eligible to receive WorkAbility1 services

INDEPENDENT LIVING SKILLS

ARISE

A non-profit since 1986. Experience counts.

ARISE Life Skills Programs for High School
Designed for those with reading and writing difficulties, ARISE interactive lessons promote communication skills and provide the tools teens and young adults need to become successful, productive members of society. Topics include anger management; conflict resolution; drug and alcohol abuse prevention; dropout prevention; health and hygiene; and much more.

The ARISE life-skills programs is a comprehensive series for high school teens and young adults. They are given essential tools such as anger management; gun awareness; how to manage their money; and self health and hygiene. The lessons are short and thought provoking and designed with these youths in mind.

Task Boxes for SpEd

If you are teaching students in special education, you're probably looking for activities to address pre-vocational skills that incorporates TEACCH® Autism Program techniques for low functioning students and those nearly job ready. Here are some simple ideas and even free printable task boxes for SpEd and Autism classrooms.

HabitWise

A Social and Emotional Learning Program for Schools
HabitWise is a Social and Emotional Learning program that helps middle school and high school students achieve their goals by teaching them how to create and track good habits and also crush distracting bad habits. HabitWise is a critical addition to the curriculum for Health, Advisory, Guidance, and Character Education classes. The entire program is free-of-cost and available online.

When our students dream about the careers they want and the things they want to achieve in their personal lives, it's important for them to understand how their habits can help turn their dreams into reality or just get in the way. About 40 percent of what we do every day is habit, so students need strategies that will help them stick to positive behaviors.

HabitWise lessons empower adolescents to use the psychology of habit formation to improve their mental and physical health, productivity, money management, and communication skills. At the end of the unit, students use a habit tracker to monitor their progress independently.
