

Linked Pairs

Solve the clues below and enter the answers into the grid according to the numbers. The answers include five capitalized words and one archaic word. Punctuation in the clues may or may not help the solver.

Six of the clue answers have to be modified before entering into them into the grid. How they need to be altered is defined by the answer word immediately after or immediately before the word to be changed. In each case, the pair of clue answers forms a common two word phrase.

When the crossword is completed properly, the letters in the shaded squares, reading from top to bottom and then left to right, will spell out a similarly altered common two word phrase.
