

# SKU003 Short Step, Below Frame Mounted

- Specifications:
- Two mounting locations per side
  - Step is 18" long and 36" above the ground
  - 250 lb weight capacity

- Applications:
- Single or dual axle trailers
  - The step mounts to the rear most part of the trailer
  - To be used by first stepping on the trailer frame or a Guide-on Step "Step 2" SKU004

Brackets for mounting must have full access to frame from all sizes. This model cannot be mounted above an integral step of the trailer – see SKU001.

It is possible to flip the mounting brackets and position the assembly above the frame to raise the step and guide 6".
