

Benny is an 8-10 yr old chi-weenie and is a regular dog in every way except he doesn't have the use of his rear legs. No worries there, though, because he is a little speed demon with his fitted cart to wheel around in. He is a sweet little boy who enjoys sitting in the sun, playing chase with the 4 legged dogs, eating and going to bed at bed time. His cart allows him to manipulate most ordinary obstacles in his path and if not, he will ask for help with a whine or a bark depending on your distance to him. Although his cart doesn't fit through my dog door, he is excellent at letting me know he needs to go outside by giving me a short whine and circling the floor. Putting him in and out of his cart is super easy. Oh and by the way, he will come to his new family with the cart and all the accoutrement's that came with it. Although we don't think he will ever regain the use of his rear legs, in the short time we have had and been able to work with him, we have seen improvements from swim therapy and acupuncture therapy. Do you have it in your heart to provide this cute little boy a forever home?
