Back & Forth

Guess the words defined by the following clues. The answers vary in length from 3 to 11 letters long and of these, 1 is capitalized, 1 is archaic, and 2 are multi-word phrases. The punctuation in the clues may or may not help the solver.

Enter the answers in the grid in one continuous string that runs in both directions. For example, Down answers will start in the top left corner and proceed down column 1. At the bottom of column 1, go to the last square of column 2 and proceed up column 2 to row 1 and then proceed down column 3, etc. Similarly for the Across entries. For 8 across words and 7 down answer words you will need to remove 1 letter from them before entering them in the grid. These 15 letters taken in order as they appear in the across and then the down clues will spell out a common phrase that, in combination with the 2 unclued entries, will thoroughly explain the nature of this puzzle.
