Project Management
Capabilities

Building Value

Oakmont's Project Management builds value and quality into every project, regardless of size type or location. Our full-service Project Management team partners with clients by using their specific business objectives as a basis for creating customized solutions.

Building on experience & excellence

OUR PEOPLE have the experience and expertise to translate client goals into successful results by achieving and/or exceeding original business objectives, schedules and budget.

OUR TOOLS, technology and training allow us to drive value on every project and reduce the time committed by our clients' internal resources.

OUR GOAL is to provide a structured and comprehensive management approach to coordinate, control and manage:

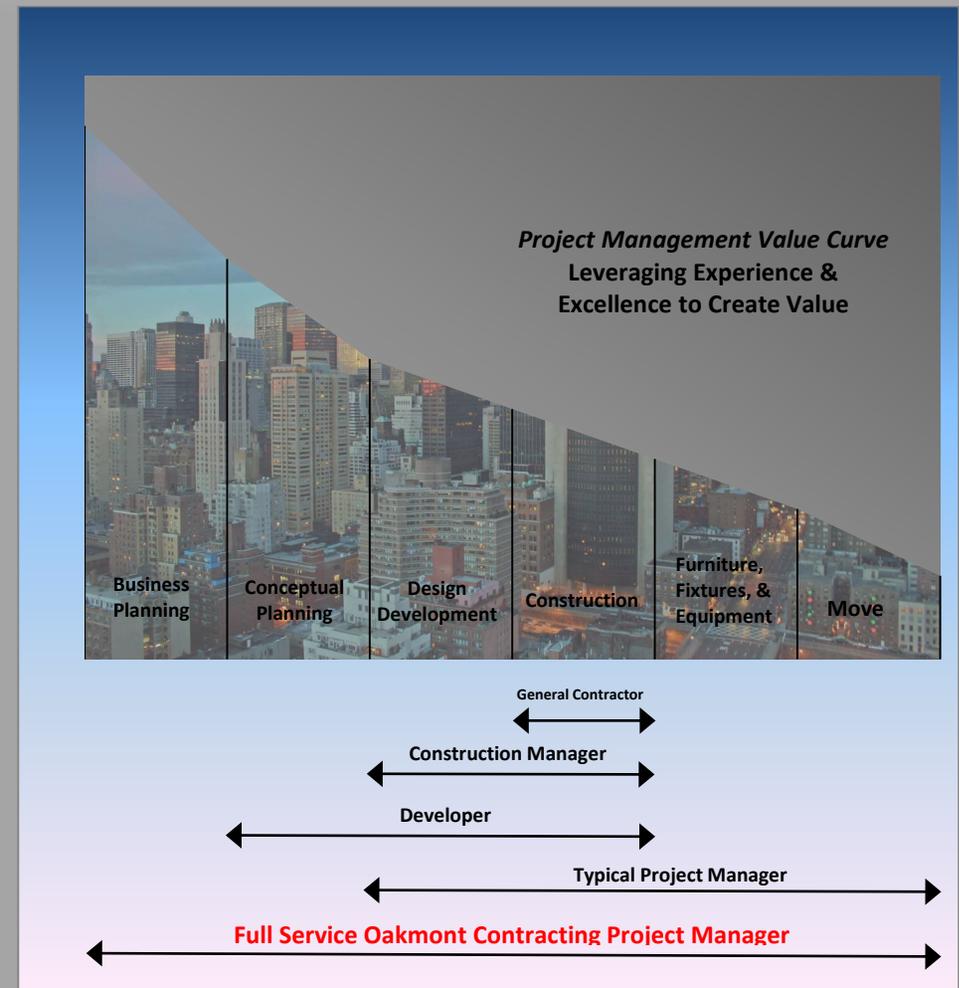

- Budget and Schedule Development
- Change Management Planning & Controls
- Construction Management Oversight
- Due Diligence
- LEED Delivery
- Moves, Adds, & Changes
- Project Materials Sourcing
- Move Management
- Project Planning & Design Oversight
- Project Team Qualification & Sourcing
- Risk Management
- Site Commissioning/De-Commissioning
- Strategic Planning
- Sustainability Consulting

For all industry types including:

- Civic
- Data Center
- Distribution
- Government
- Healthcare
- Education
- Hospitality
- Mission Critical
- Office/Headquarters
- Research
- Retail
- Technology
- Utility/Energy

Building value

Oakmont's process experts engage early to maximize client performance and project budgets and schedules

Green Building is the practice of designing and constructing energy efficient, environmentally friendly buildings that optimize occupant health and productivity. Through this they reduce the building's impact on the environment, but here are other more immediate benefits:

- Increases Building Value
- Decreased Operating Cost
- Improved Occupant Productivity
- Improves Overall Quality of Life

Construction management by the Oakmont team is marked by exacting attention to detail and full coordination of all project steps and resources involved. Whether it is the design of a base building or the coordination of an interior buildout, Oakmont's construction management team fully embraces every project. Oakmont also coordinates work with architects, identifies contractors and subcontractors and manages schedules to ensure an on-time delivery. From beginning to occupancy, our coordination, recordkeeping, attention to detail, and service have earned us the region's top reputation.

Oakmont utilizes Constructware® software in the cloud, which is part of the Autodesk solution for construction. It provides an on-demand environment for construction project management and collaboration. Connect People, information, and processes so that your projects can run smoothly to completion and beyond, promoting greater accountability and minimizing costs. Oakmont also utilizes Primavera P6 which is the recognized standard for high-performance project management. Primavera P6 handles large-scale, highly sophisticated and multifaceted projects. It can handle nearly an unlimited amount of activities with unlimited resources and an unlimited number of target plans.
