

Burn treatments

Skin substitutes and options to promote healing

**Tuesday, November 30
6-7 p.m.**

**Online WebEx hosted by the
Emergency Education Center**

Learn more about how a verified burn center treats injuries once a patient arrives. The focus of this education event is treatment with the use of skin substitutes that assist in burn healing. You'll gain an understanding of the challenges related to the treatment of burn wounds and learn about new technologies that can be used as adjuncts to skin grafting.

Angela Gibson, MD, PhD, FACS, UW Health surgeon and co-director of the Burn and Wound Center will discuss burn treatment advances and treatment options for all types of burns.

Registration

This event is free. EMS CEUs and Nursing Contact Hours will be provided.

[Register here or go to uwhealth.org/burneducation](https://uwhealth.org/burneducation)

UW Health's Burn and Wound Center is verified by the American College of Surgeons (ACS). Verification is a true mark of distinction that places University Hospital among an elite group of critical care centers offering the most comprehensive critical care available for both adult and pediatric burn patients.

Who should attend?

Professional and volunteers in any healthcare role are welcome to attend.
