

GDP 8007

Special Cleaner for Aluminum and its Alloys
Water Soluble Concentrate

Application Information

Operation	Dilution Ratios
Immersion systems	10:1 to 20:1
Ultrasonic tank systems	15:1 to 30:1
Jet spray application*	10:1 to 30:1
Manual cleaning	10:1 to 20:1

****Important: Please specify GDP 8007 specifically for jet spray applications***

- ▶ For best results, use water at a temperature range of 140° - 160°F (60° - 71°C)
- ▶ Always add water to concentrate.
- ▶ Do not leave part immersed for longer than 60 minutes. Oxidation may occur if part is exposed to cleaner for long duration.

Specifications and Properties

Physical state	Liquid
Color	Clear, colorless
Solubility in water	100%
pH value (10% solution)	1.3
Explosion hazard	None
Weight	8.3 lbs./gal.
Ingredients by chemical family	Modified phosphoric acid esters, nonionic surfactants and dissolver
Packaging	Available in: 5- gallon and 55-gallon containers.

Please refer to Material Safety Data Sheet for additional details.

GLOBAL DIVERSIFIED PRODUCTS' cleaners, degreasers and metalworking fluids are composed of surfactants and fatty acid esters derived from non-citrus plants, a self-replenishing resource. They contain no ozone-depleting chemicals or other materials harmful to workers or the environment.
