WHEREAS: The transition to 100% renewable energy will enhance real estate values and promote economic growth in Hull, and facilitate local control and ownership over energy options; now therefore be it

RESOLVED: That the Town of Hull will establish a 100% renewable energy climate action committee to develop and make publicly available an operational plan on how to achieve the goal of using 100% clean and renewable energy by 2030 for all public, residential, and commercial energy uses in Hull, including heating and transportation, and report quarterly to the Selectboard on its progress; and be it

ORDERED: That the Town Manager will report to each annual Town Meeting on progress made on this matter. (Inserted at the request of Judeth Van Hamm and others)

Recommendation: Favorable Action on Article 29: Majority: The Advisory Board feels that a committee to form a plan for renewable energy is a good step in the right direction, and zero cost to the residents and taxpayers in the Town of Hull. Minority: The goals expressed are admirable and for those, there is no objection. The reality is that advances in gradually decreasing our reliance on fossil fuels will come about whether this committee exists or not. It didn’t take a committee to have the Light Plant change street lights to LED bulbs. It didn’t take a committee to push the light plant to install wind turbines. Yes, it didn’t take a committee or two to get the projects rolling, but not to initiate them. Other advances will come along in all areas of domestic and town life. The reasons for the recommendation for unfavorable action are that the goals expressed have real life consequences. As things are now, the Town has trouble filling vacancies on boards. This article calls for the creation of a seven-member board. If enacted, this article would not allow the use of internal combustion trucks for town services. As one Advisory Board member expressed it, “Does the mean we have to ditch our diesel snow plows and get electric ones by 2030?” Most people have had energy audits on their homes, and most did not follow through on all the recommendations because costs weren’t justifiable. This article places a burden on the town that may not be economically feasible. Finally, should some say, “It sets a goal, even if we can’t accomplish it all.”, to that, this opinion counters, “Yes.” And we can do it without creating another committee. (7-1)

ARTICLE 30- REDUCTION OF SINGLE USE PLASTIC BAGS IN HULL
To see if the Town of Hull will vote to amend the General Bylaws by adopting a bylaw entitled “Reduction of Single-Use Plastic Bags” as follows:

SECTION 1 – FINDINGS AND INTENT
FINDINGS: The production and use of thin film single use plastic checkout bags have significant impacts on the environment, including, but not limited to: contributing to the potential death of marine animals through ingestion and entanglement; contributing to pollution of the land environment; creating a burden to solid waste collection and recycling facilities; clogging storm drainage systems; and requiring the use of millions of barrels of crude oil nationally for their manufacture. The purpose of this Ordinance is to eliminate the usage of thin-film single-use plastic bags by all retail establishments in the Town of Hull. Currently over 80 Massachusetts cities and towns, including Plymouth, Duxbury, Marshfield, Bridgewater, and much of Cape Cod have passed plastic bag bans, and more have bylaws pending.

INTENT: The Town of Hull hereby enacts this bylaw to help reduce the deterioration of the environment and the ensuing potential health risks by eliminating the use of the thin plastic carryout bags at the point of sale and promoting the use of reusable bags.
SECTION 2 – DEFINITIONS
PLASTIC CARRYOUT BAG: A plastic carryout bag is a thin film plastic bag with handles provided to a customer by an establishment and used to transport merchandise from the establishment. Plastic carryout bags do not include those plastic bags typically without handles used to contain dry cleaning, newspapers, or small bags used to contain fish, meat, produce or other products provided to the consumer, free of charge, to deliver the items to the point of sale.
REUSABLE CARRYOUT BAG: A bag with stitched on handles that is made solely of or in a combination of natural cloths, synthetic fibers, or other washable material and is specifically designed for multiple reuse. These bags are generally sold to the customer for a reasonable cost.
RECYCLABLE PAPER BAG: A paper bag that is 100% recyclable and contains at least 40% post-consumer recycled paper content and is provided free of charge to the customer.
ESTABLISHMENT: Any establishment includes businesses selling or distributing food, goods, articles, or personal services to the public.

SECTION 3 – PLASTIC CARRYOUT BAG PROHIBITION
No establishment in the town of Hull, as defined in Section 2, shall provide plastic carryout bags, as defined in Section 2. Establishments in the town of Hull, as defined in Section 2, shall only provide reusable carryout bags that comply with the definition in Section 2, or recyclable paper bags, as defined in Section 2, at the point of sale.

SECTION 4 – ENFORCEMENT: All of the requirements set forth in this bylaw shall take effect on January 1, 2020. However, if a retail establishment cannot comply with the effective date of this bylaw due to economic hardship, the establishment may petition the Board of Health for an extension of six months. This Bylaw may be enforced by any agent of the Board of Health by:
1. Inspection and investigation
2. The issuance of violation notices and administrative orders
3. Civil court actions

Whoever, himself or by his servant or agent or as the servant or agent of any other person or firm or corporation, violates any of the provisions of these regulations, may be penalized by a non-criminal disposition process as provided in M.G.L. c. 40, 21D. Each day of violation after written notice, is a separate violation.

The following penalties shall apply:
1. First Offense – Written Warning
2. Second Offense - $50 Fine
3. Third Offense - $100 Fine
4. Subsequent Offenses - $200 Fine

SECTION 5 – SEVERABILITY
If any provision of this bylaw shall be held to be invalid by a court of competent jurisdiction, then such provision shall be considered separately and apart from the remaining provisions of this bylaw, which shall remain in full force and effect.
(Inserted at the request of Jason Frady and others)

Recommendation: Favorable Action on Article 30: Single use plastic bags are an obvious, wasteful threat to the environment. Having not heard a single compelling argument not to and strong rational reasons in favor, as well as local businesses contacted not in opposition, the Advisory Board agrees with the petitioners. (Unanimous)
