

# Safety is our First Priority

At DP Industrial, we care about our workers and the people we work around. We believe that we each should watch out for the other guy's safety the way we watch out for our own.

DPI employs full time Safety Professionals who are continuously learning and implementing Best Practice safety techniques. We train our employees in-house 8 hours before they ever go to work. DPI can supply MSHA, OSHA, and Scaffold Competent Person training.

DPI employs Drug Testing, E-Verify, and if required for the client, Background Checks before we send our people to your job.

We keep our employees involved in our Safety culture by having each worker engage in the conducting of safety meetings. We train and encourage each employee to be aware of the hazards they work around for each job they work on throughout the day.

## “Safe & Efficient”
