

## **GARDENING SCHOOL**

For all gardeners with interest in horticulture who have had little professional training, these courses are designed to:

- Stimulate interest in the growth of plant materials to their peak of perfection.
- Give an understanding of how and why a plant grows.
- Teach soil structure and methods for making soil more productive.
- Illustrate methods for rapid propagation of plants.

### **General Information**

All lectures are open to the public for the stated fee. To be eligible to take Gardening School Courses for credit toward a National Garden Clubs, Inc. Gardening Consultant's Certificate, one must either be an active member of a State Garden Club or a non-member who, in good faith, expects to become a member of a State Garden Club in the near future. After taking the four courses, passing the examinations and complying with all requirements, the student will become a Nationally Accredited Gardening Consultant.

### **Refreshers**

Gardening Consultants may refresh in any accredited Gardening School Course by attending all lectures and all scheduled activities of the course. No exam is required.
