I gave my maximum effort in this course this semester.

3 - Briefly describe:the most significant idea(s) /skill(s) that you learned through this course this semester, andhow this course affected your artistic/intellectual growth, values, or perceptions, etc.

- I improved on my ability to sight sing, as well as my dictation skills
- I learned to always be mindful of the rules, but that it is okay to break them as long as I know what the rules are. This course affected my perception of music. Not everything will have a correct answer, and sometimes one problem may have multiple answers.
- a. i think that musicianship is a huge building block for all my other courses- therefore, if you have a strong foundation from ear training, the rest of your music classes will be vastly easier. Mr. Lively has given us those tools that we need to succeed in our other classes as well. b. Aside from part A, this class has also affected my artistic growth by not inhibiting me. I usually had to spend about an hour-2 hours on homework for theory and musicianship a week. This was a perfect amount to make sure that I was well prepared for class, but not affecting my practice time or other classes. Professor Lively does a good job of finding that balance between learning and not overloading his students.
- Dictation has been my biggest area of growth this semester. I feel like I can work better with other musicians, especially in settings with no sheet music.
- Aural skills definitely got better, which is super helpful in playing my instrument.

5 - Please comment on the strengths/weaknesses of the instructor and/or offer any suggestions for improving the course.

- Dr. Lively is wonderful at teaching the material in a way that makes it easy to understand and learn.
- Dr. Lively made musicianship seem simple in comparison to how I had been taught it in high school. I felt like I could succeed in his course
- Dr. Lively is a great professor who has an extensive knowledge of theory and of random topics as well. He always mentions random facts, which helps keep the class light and entertaining, rather than dreadful because of the challenging problems of the class. I would not change anything about this class.
- I don't believe in efficiency either.
- Dr. Lively is a great instructor, I love being in his class literally always. He's always interested in what he teaches.

3 - Briefly describe:the most significant idea(s) /skill(s) that you learned through this course this semester, andhow this course affected your artistic/intellectual growth, values, or perceptions, etc.

- I didn't really learn anything in music theory this semester that I didn't already know.
- The most significant skill I learned was figuring out secondary dominant chords. This course affected my intellectual and artistic growth tremendously. I am definitely a more well rounded musician now.
- A. better singing skills and listening skills b. it helps being able to hear stuff when you are playing an instrument
- I learned a lot about four-part writing and made me naturally analyze music I was hearing, listening for cadences.

3 - Briefly describe:the most significant idea(s) /skill(s) that you learned through this course this semester, andhow this course affected your artistic/intellectual growth, values, or perceptions, etc.

- Musicianship has always been very challenging for me. This course strengthened my Solfege and sight reading skills, it also helped my piano skills and transposition skills. I never thought I'd be able to sight sing a tonal music, but Dr. Lively gave us really great tips for how to achieve our goals. I always disliked atonal music, but I have a new appreciation for it, and for how strong it has made my ear when listening to and learning music.
- The added aural abilities have increased the breadth of music from which I can draw entertainment.
- I learned that atonal musicianship skills are difficult to master, and will probably have very little to do with my path as an musician....
- a. The most significant skill I learned was how to sing atonally because I had never sung such a thing beforehand. b. It affected my growth by allowing me to try new musical techniques.
- I will apply what I learned in this class to my every day musicianship.

5 - Please comment on the strengths/weaknesses of the instructor and/or offer any suggestions for improving the course.

- The Professor was great at communicating with us both in class and out of class. He was always willing to explain something in a different way if we didn't understand, and or class was always engaged in learning. He was fun and made the heavy course content light and fun to learn, even though it was extremely challenging.
- Going over how to practice for in-class exams helped greatly in determining how to go about studying for each of these weekly exams.
- Professor Lively is a great teacher. Every topic that was required of us to learn, I feel, was accomplished in a timely and efficient manner. He is very professional, and although a little nervous around new people sometimes, has a great teacher personality. I like the way he keeps track of time during class as that makes it feel really thoroughly planned out. Sometimes I wish the 'hunger games' method of testing random students before an exam wasn't a thing, but I get it. It's just very stressful and potentially embarrassing.
- Dr. Lively was a fantastic instructor who truly knew the course and its subject matter.
- The instructor made the course feel easy because he taught things so clearly. If we struggled to understand material, he would find a new way to teach it so that we could all succeed.

3 - Briefly describe:the most significant idea(s) /skill(s) that you learned through this course this semester, andhow this course affected your artistic/intellectual growth, values, or perceptions, etc.

- I learned how to analyze music with a lot of non-chord tones, and how to apply new scales. This course was very challenging for me, but I greatly enjoyed it! This class has really helped my artistic growth with partwriting as well as being able to approach my music from a theoretical stand point instead of just thinking there was no rhyme or reason to what was on the page as far as non-chord tones.
- Everything learned was immediately put to use in my own compositions (not a part of any instruction, just a thing I do a lot) immediately upon learning which made each thing applicable and easy to learn.
- a) the most significant skill I learned was how to write tone rows. b) this course affected my growth by showing me skills I had never experienced before.
- I learned how to better analyze music, which I can apply to my everyday playing.

5 - Please comment on the strengths/weaknesses of the instructor and/or offer any suggestions for improving the course.

- I think Dr. Lively is a phenomenal teacher - as a person that has always struggled with music theory, he made it pretty easy for me to succeed in this course!
- The added tangential information was always interesting. The instructor definitely knew what he was talking about on every topic and the math/intellectually based music reached near the end of the course was new and interesting.
- Dr. Lively is a fantastic instructor who truly knew the course and its subject matter.
- In the past, I have struggled with theory. However, this instructor taught things so simply and clearly, which made the material seem easy. I am extremely thankful for this great instruction. Very beneficial.
- While it may be too advanced for this class, I wished we had analyzed full pieces (or large chunks) of 12 tone music to see how composers arrangements the tone row throughout the piece, rather than just creating the matrix.
