## India Environment Portal KNOWLEDGE FOR CHANGE

### Ducking the truth about Europes GMO policy

- 27/11/2004
- *International Herald Tribune (Bangkok)*

The only surprising thing about the recent World Bank report is that otherwise reserved scholars minced no words in calling the European Commission's obsession with avoiding genetically modified

### About Us

The India Environment Portal is initiated and managed by the Centre for Science and Environment (CSE) promoted by the National Knowledge Commission (NKC), Government of India.

### About NKC

The National Knowledge Commission (NKC) was established in 2005 by the Prime Minister of India as a high-level advisory body with the objective of transforming India into a vibrant knowledge-based society. As part of its mandate, NKC has actively supported the creation of 'knowledge portals' that aggregate and present useful data, information and research across key sectors.

### About CSE

The Centre for Science and Environment (CSE) is an independent, public interest organization, which uses knowledge for activism. The Centre was started in 1980, by India's top environmentalist, Anil Agarwal and continues to work to push, prod and argue for environmental management in the country. It believes it can and must make a difference.
