

# **The Learning Principles of The ASC:**

- 1. Students' prior knowledge will help or hinder learning.**
- 2. How students organize knowledge influences how they learn and apply what they know.**
- 3. Students' motivation determines, directs, and sustains what they do to learn.**
- 4. To develop mastery, students must acquire component skills, practice integrating them, and know when to apply what they have learned.**
- 5. Goal-directed practice coupled with targeted feedback enhances the quality of students' learning.**
- 6. Students' current level of development interacts with the social, emotional, and intellectual climate of The ASC to impact learning.**
- 7. To become self-directed learners, students must learn to monitor and adjust their approaches to learning.**
