Baker to Vegas 2017 Leg Check-in Schedule

Runner Check-In Procedures

- All runners will contact the Command Post PRIOR to leaving Vegas for their leg assignment.
- All runners will contact the Command Post AFTER arriving to their leg assignment.
- All runners will check-in at their assigned leg—near the mobile homes and exchange chute—no less than one hour prior to your estimated start time. Alternates will obtain a yellow bib from the follow-van.
- All runners will be required to show a **Driver's License/ID** (or photocopy) at check-in.
- All runners will be required to complete the emergency info on back of bib. Know your health care provider contact info.
- All runners running after 1900 hours will be required to wear a LED light vest—they will be provided for you by the team.
- All runners are required to have a Catcher at the conclusion of their leg. One will be available if you do not have one already designated. ANYONE can be a Catcher, but they must be wearing a vest with a team bib # on it AND be holding a bottle of water.

Follow-Van/Alternate Team Procedures

- Each team—consisting of the van crew and an alternate runner—will meet at the Command Post located at the Residence Inn Marriott (Room #TBD) and check-in with the Command Post staff to obtain keys to the transport vehicle.
- Make sure you bring a lunch and water.
- The team leader will obtain the key to the transport vehicle, and cash for gas and ice (Team #1 will take the follow-van initially). (*) Denotes team leader.
- The team will drive to its assigned leg and contact the Race-Day Coordinator at the leg.
- When the follow-van arrives to the leg, the new van/alternate team will replace the previous team. The replaced van team will return to Vegas using the transport vehicle, refuel the transport vehicle, and return the vehicle to the team hotel—the team leader will return the keys to the Command Post.

Race-Day Coordinators

The Race-Day coordinators will provide pre-run and post-run support to runners at the leg in the following manner:

- Meet each runner at each leg to assist with runner check-in.
- Verify the runner coming in has a Catcher with a vest, bib#, and a bottle of water.
- Verify the outgoing runner has the required equipment (e.g. the appropriate running clothes, an LED vest after 1900 hours, etc).
- Communicate with the follow-van via two-way radio and notify the next runner of the two-mile AND one-mile warning. Stay in constant contact with the outgoing runner.
- Catch the incoming runner if the runner does not have a pre-designated Catcher.
- Communicate with the Command Post—where communication service is available—and report race status (e.g. the “starting time” of each outgoing runner...not split time).
- Race-day coordinator should carry a travel cooler with water and extra LED vests and bib #'s in their vehicle. Make sure to bring lunch/dinner/snacks as well.
