"Sarbu" Self-Righting Needle Holder, 5 mm

	8393.506	5mm		•	•	8393.503
Multifunction needle holder by Sarbu single action	8394.506	5mm		•	•	8394.503

1. Self-Righting feature for curved needles:

When the movable jaw is closed, the needle automatically self-rights to the correct working position

2. Needle transfer

The atraumatic surface on the most distal portion of the needle holder ensures safe and reliable grasping of sutures or curved needles of various sizes.

3. Suture cutting

Without changing instruments, sutures can be cut safely and quickly. The fixed cutting edge is located in a protected position close to the hinged joint to allow for precise cutting of the suture.
