

# Gas Monitor Calibration Certificate

## General Gas Monitor Information

Company:

Brand:

Report Date:

Serial Number:

Model Number:

Calibration Number: 1000

## Instrument Received

- In tolerance, no adjustment required
- In tolerance, but adjustments made
- Out of tolerance
- Inoperative / Damaged
- Instrument Conversion

## Instrument Returned

- In tolerance

## Calibration Results

Tolerance As Found

| Sensor # | Gas Type | Concentration | Data as Found | Tolerance As Found       |                          | Calibration as Left |
|----------|----------|---------------|---------------|--------------------------|--------------------------|---------------------|
|          |          |               |               | In                       | Out                      |                     |
| 1        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |
| 2        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |
| 3        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |
| 4        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |
| 5        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |
| 6        |          |               |               | <input type="checkbox"/> | <input type="checkbox"/> |                     |

## Standards Used In Calibration

| Standard | Lot Number | Description | Accuracy | Cal Date | Exp Date |
|----------|------------|-------------|----------|----------|----------|
|          |            |             | +or-     |          |          |
|          |            |             | +or-     |          |          |
|          |            |             | +or-     |          |          |
|          |            |             | +or-     |          |          |

Notes

Paramount Gas Products has inspected, repaired (if necessary), and calibrated the instrument above, and it was found to meet or exceed the manufacturer's specifications. The primary error source for this calibration is the accuracy of the gas. Gases are certified by the manufacturer by volume using a gravimetric method of analysis against NIST traceable weights. All test and calibration records, including the Certificates of Analysis for each gas used in the calibration, are maintained by Paramount Gas Products.
