## ABOUT THE EVENT

The dynamics of Indian Industry segments of Fertilizer, Food and Pharmaceutical are now creating a notable impact on the national scenario and with the demand for new projects, expansions and modernization. All round efforts of the Public Sector and Private sector enterprises are showing clear signs of growth. Post COVID -19 the well-established need for Digitalization has created unprecedented global technology trends, where all industries alike have started taking new leaps to Learn, Adopt and Customize their Plant Automation requirements with Digital technology.

This Fertilizer, Food and Pharma Symposium is being conducted by ISA Delhi since last Four years in succession until 2019. After the COVID-19 disruptions, this year we have received renewed demands by the Industry Stake-Holders to once again bring together the Electrical, Instrumentation, IT & OT experts from the Fertilizer, Food Processing and Pharmaceuticals industry domain to exchange the benefits of latest advancements in automation and instrumentation technology in the Indian context.

The event gives opportunities to explore the generic Technology Trends; the Specific Case Studies on best practices; the Transformative Digitalization among the Batch Processing and Continuous Processing Industries to update themselves with the evolving Information Technology, Control and Instrumentation advancements and create a sustainable future.

Don't miss your opportunity to collaborate with industry visionaries as well as technology pioneers at this new Hybrid industry event and hear the experts' views on the latest automation trends in Fertilizer, Food & Pharmaceutical Industries in India
