

PORTABLE RATE AND LEVEL SYSTEM

IXI ABSOLUTE CONTROL

At **ABSOLUTE CONTROL, LLC.**, we provide quality equipment designed with our customers specific needs in mind. Quality and customer service are the foundations on which Absolute Control was established and we pride ourselves with delivering control systems that are worthy of carrying the Absolute Control name.

12" HMI TOUCHSCREEN

- Portable enclosure
- Displays up to four additional inputs. (Pressure, Temperature)
- Displays four tank level, displays inches and barrels and flow rate in bbl/min

SENSORS

- 2" 1502 Male pressure sensors
- GWR tank level sensors available in any length up to 20'
- Clamp on temperature sensors

PLC

- Battery back-up providing 20 minutes of run time
- Wi-Fi/Cellular communications available
- Data logging
- Remote tablets available
- Web view of real time data available
- Programmable tank data (Strap list or tank dims)

Our Engineering, Operations and Sales staff have years of experience in drilling and completions. We have operated and installed control systems for decades and use that experience to continually improve the design of our control systems and make them more user friendly and efficient. We also use this experience to help our customers design control systems to meet or exceed their requirements. Our control systems are available to meet the following requirements: **API 16C, CE, ATEX, IEC, NORSOK, GOST, etc.** We can also supply control systems with third party design review and or witness testing, **ABS, DNV, Lloyds, Bureau Veritas, etc.**
