Solving Problems Providing Solutions

GTC's

Cloud- Based Solutions

We are a leading provider of enhanced cloud services. Delivering mission-critical products engineered for the SMB and LE Markets. We've designed our network with only the most reliable and dependable network components, including BroadSoft™, Cisco™, IBM®, and Acme Packet™ with established redundant connections, to support both public and private traffic to our secure facilities. Our geo-redundant infrastructure provides the most secure and highly available network in today's cloud computing market.

Hosted PBX & SIP Trunking

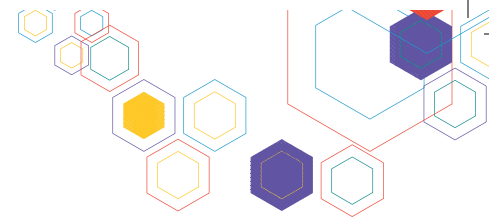

With this rapid migration, GTC offers two major flagship products: **Hosted PBX** and **SIP Trunking**. Our Hosted PBX is a secure cloud-based PBX solution in which all business phones connect and operate off of our redundant and geographically-dispersed BroadSoft switches. We deliver your voice solution in a cloud-based, voice-as-a-service model. Our SIP Trunking consists of talk paths delivered to your existing PBX enabling you to convert your legacy or IP-PBX into a more flexible and technically advanced solution.

Communication is rapidly migrating from premise-based to cloud-based.

Providing Solutions

Businesses are finding new levels of productivity with:

Hosted PBX

Hosted PBX is a secure cloud-based PBX solution in which all business phones connect and operate off of our redundant and geographically-dispersed BroadSoft switches.

SIP Trunking

SIP Trunking consists of talk paths delivered to your existing PBX enabling you to convert your legacy system to a cloud-based one.

Analog Trunk Replacement

Phone carrier and line are removed, consolidating your communication charges, allowing you to take advantage of our unparalleled calling features and rates.

Smart Record

SmartRecord is a value-added optional feature that enables both inbound and outbound calls to be recorded and stored as MPEG files.

Communications Re-defined.

Broadworks Meet-Me Audio Conferencing

A high quality conferencing application that is part of BroadSoft's Unified Communications capabilities, enabling service providers to offer HD conferencing

Dialer for Google Chrome™

A fully integrated Chrome Dialer Extension with Salesforce and eAgent built-in. Our dialer will work with your PBX phone systems as well as just using the browser window.

Enhanced Call Center

Enhanced Call Center will make quality control and agent/customer reporting a breeze.

Virtual Fax

Send all of your faxes and voicemails to your email inbox with Virtual Fax.
