A Renewable Source

It all starts in the woods. Our native hardwood trees are an invaluable resource that we do well to perpetuate. Most hardwood tree species take 75 to 125 years to reach maturity.

To be truly sustainable, the products we produce from these trees need to last longer than it takes the tree to grow.

Craftsmanship

Our craftsmen understand the inherent qualities of wood.
They meticulously handpick the finest hardwood to create your furniture. Every piece is carefully shaped and planed, bringing it to perfection. Attention is given to every detail. The best; and only the best passes final inspection.

Snaurance

Good things are meant to last.

And so it is with every piece
of Kid's Comfort furniture.

Each component's hefty caliper
contributes to the unrivaled
strength and endurance of the
finished product.

Beauty

Few things are more impressive then the pristine beauty of wood grain. Every piece of furniture is a unique specimen with its own grain design. We carefully stain and hand rub each piece to capture and preserve this naturally occurring wonderment.

Safety

It's all about the baby. Our cribs undergo rigid testing and fully meet federal standards. After all, it is an investment in our future.

### Organic Options

Imagine creating a pristine, chemical-free micro environment for your baby. Kid's Comfort Organic allows you to do just that. All our standard products are created with child safe varnishes and meet ASTM standards and consumer safety product standards. However with Kid's Comfort Organic you can now provide your child with products that exceed these regulations. Enjoy peace of mind knowing you are doing your utmost with eco-friendly, organic furnishings.

Components and Construction

Solid wood materials only are used throughout: fronts, tops, sides, bottoms, backers, drawer bottoms, braces and partitions. There is absolutely no plywood or particle board used anywhere!

Every piece is handcrafted and hand assembled right here in our own workshop. The glue used in assembling Kid's Comfort Organic products is not totally chemical free but it is water-based with a very low chemical content. The only reason we use this glue is lack of any organic wood glues. We are committed to upgrading as organic glues are developed.

Our Organic finish is a linseed oil derived from natural flaxseed. This product is non toxic, 100% VOC free, has no chemical driers, is non flammable, compostable, and environmentally & food safe.

Two applications of this organic finish is hand rubbed onto raw wood, preserving the natural beauty and appearance of your furniture.

### New : Improved testures

Our finishing process comes standard with FORMALDEHYDE FREE coatings.

- · All Cribs are redesigned with hidden fasteners to hide or eliminate as many bolts and holes as possible.
  - · Cribs are built with sturdy mortise and tennon construction designed for years of use.
  - · Drawer systems have under-mount, soft-close, Hettich drawer slides to eliminate slamming drawers in your nursery.
  - · New Three position Y-frame mattress support system designed to not leave any visible holes in your crib, converted toddler bed or full size bed.
    - · We eliminated wood plugs to cover screw holes on top moldings by using our new hidden fastener technology.
    - · All furniture pieces come with a wall anchor to prevent tipping hazards in your nursery.
    - · Our furniture back pieces are finished with the same quality and processes that all other visible parts are.
- · Kids Comfort has invested heavily in their own in-house finishing and Quality Control systems. Each piece of furniture is inspected and critiqued with a QC form that gets checked off,dated, and signed by one of our team members. This form then is included with your purchase.
- · As always all Kids Comfort cribs are fully convertible, and are tested and certified to CPSIA and ASTM federal standards with a certificate on every box we ship out.

### To Our astoners:

We appreciate you considering the purchase of our furniture. Kids Comfort strives for quality and service to you as our customer. We are real people that answer our phone and personally work with you to accomplish your goals. Our objective is to treat our customers the way we expect to be treated and give nothing but complete satisfaction.

Kids Comfort cherishes your interest in local sourced product and labor that keeps our jobs at home. Our hardwood lumber is sourced from the Appalachian region here in the mid western states and our labor is sourced 100% locally. You can be assured that our purpose for you as our customer is building healthy relationships, creating a safety minded culture, displaying superb products, and offering unwavering service.

As the owner of Kids Comfort, a husband to Rosanna, and a father to Jon Mark, Juanita, Japheth, Caleb, Julie, Isaiah, and Seth we realize the importance of quality, safety, endurance, and service. In closing my goal is to serve you.

Soe Troyer

### STANDARD Teatures

Cribs & All Surface Coatings Are Tested & Certified To Federal Standards. Formaldehyde Free finishes come standard on all Kids Comfort furniture.

Hidden Fasteners On Top Molding

No Bolts Showing (Hidden Fastener)

Finished Slats For Bed & Rail System

Solid wood backer

Solid wood braces

No plywood in any part of your case piece

### Simple Solutions FOR CUSTOM REQUESTS

Have you ever heard the following? "I like this but..." "Can you add..." "Would you change..."

We have, along with the frustrations furniture retailers experience with custom requests. But we decided to simplify the process, so you can actually promote custom furniture and enjoy it. We provide detailed line drawing proofs to help everyone involved visualize the finish product. Accuracy is the key to successful customization. Our experienced staff and dependable system stand ready to help you to that end.

CREAT NEW LINE DRAWING PROOF

\*Due to federal standards, customization on cribs is not available

Shipping Information

Here at Kids Comfort we offer different kinds of delivery options as follows. Please contact us for rates.

(Blanket Wrap) We shrink wrap and blanket your furniture after inspecting each piece carefully and thoroughly. Then your furniture is hand loaded into a specialized furniture trailer and delivered to you by a furniture delivery team that is experienced and professional.

· (Freight) We shrink wrap your furniture after inspecting each piece carefully and thoroughly. We then use a two part box with a base that has Styrofoam on the bottom and the sides and tops are filled with

expandable foam to keep your furniture from being jarred. We then strap your whole order on a pallet and ship to any destination in the US or Canada.

· (White Glove Inside and Setup)We shrink wrap and blanket your furniture after inspecting each piece carefully and thoroughly. Then your furniture is hand loaded into a specialized furniture trailer by a delivery team. These team members then coordinate with you to schedule delivery, assembly and setup at your convinience and location.

### Some things in life never change...

will always be precious gifts.

They will always need someone to love them,

Cuddle them.

To fill their tummies and dry their bottoms. This blissful state to them is baby paradise.

They need a spot where they feel comfortable.

Secure.

A well built crib

That is conscientiously crafted for baby's safety Brings peace of mind to the parents.

Kid's comfort will always provide only the best.
Sturdy handcrafted creations that are designed to last

For a lifetime.

Cribs that meet federal standards

And grow with your child.

We understand because we have babies, too.

# Tanessah Series
