

Gas Leaf Blowers (cont.)

So, what's a homeowner to do? Undoubtedly leaves on the lawn can smother and damage the grass. If raking and placing the piles of leaves on another part of one's property is not an option there are other alternatives. An organization called Leave Leaves Alone! <https://www.leaveleavesalone.org/> recommends mulch mowing and is a great resource to look into. Battery operated leaf blowers whilst not a panacea, have less of an impact in all areas noted above compared to GLB.

Whatever you, or your landscaping company's leaf blower practices are I hope this article will encourage you to banish the GLB from center stage!
