'But in those Days, after that Tribulation, the Sun shall be darkened, and the Moon shall not give her light. And the Stars of Heaven shall fall'.... – Mark 13: 24-26

The purpose of this study is to correlate the solar eclipses within the 2014-15 *Tetrad* based on the mathematical *Golden Ratio* or *Fibonacci Sequence*. This analysis will consider the solar eclipses that are directly associated with the 4 *Blood Moons* of the *Tetrad* of 2014-15. It appears that the eclipses within the *Tetrad* culminate in a sequence based on specific mathematical factors of time and frequency. This correlation is primarily associated with the start and mid-point of the *Tetrad* when the *Fibonacci Sequence* is applied. If this would be the case, one could use the *Fibonacci Sequence* to possibly extrapolate the timeline of other prophetic events based on the *Golden Ratio* day-counts. The *Fibonacci Sequence* takes the numbers derived from the *Golden Ratio* and ascribes them into a binary code. This code has many uses and has found application in such areas from programming to market analysis, etc.

These mathematical counts starting from certain eclipses could suggest if possible end-dates may occur after the *Tetrad* of 2014-15 and if there would be any prophetic significance to them. This study suggests that the *Golden Ratio* foremost has a prophetic association with the eclipses time. Why is this important? Such a template could lend a clue as to when, for example the prophetic 70th *Week of Daniel* could possibly be initiated. Perhaps the eclipses within the *Tetrad* could be serving as 'benchmark' in the celestial clock of eschatology or countdown. The *Tetrads* could very well be associated with the Rapture of the *Bride of Christ* given such a mathematical sequence that could allude to when the end of the *Church Age* will be perhaps. Christ did admonish His Followers during the *Olivet Discourse* to heed the *Signs* of the Heavens. Such occurrences are primarily marked by particular solar and lunar eclipses.

To reiterate, this study suggests that prophecy is a condition that is subject to the same *Fibonacci Sequence* and that Biblical Prophecy is revealed and/or occurs in phi ratio of time. If this is the case, then future prophetic events can perhaps be ascertained by this key to prophetic fulfillments. Regarding prophecy, Mark 13 does have multiple layers of meaning and may be difficult to discern but the *Signs* given were in direct association to Jesus' 2nd coming. Unlike the book of Revelation, the *Olivet Discourse* was given in chronological order. Biblical Prophecy has an immediate fulfillment and a long-term prophetic fulfillment that is also intertwined with the past, present and future events all in the same context.

Prophetic Time Sequences

The *Signs*, in the context of the *Olivet Discourse* depend on the time at which the prophecies were spoken. To the Disciples of Christ, the prophecies that Christ spoke about were all in the 'future' from their reference point in time. It alluded to a future time associated with the coming completion of Israel's judgment, persecution, desolation, etc. In the past, Daniel's *Abomination of Desolation* was referenced within the past during Jesus' discourse with His Disciples but of a future fulfillment. Christ alluded to the Prophet Daniel's 'Weeks of Years' prophecy as the foundational code to *End Times* that would repeat itself, and this in *phi ratio* of time as this study purports. For example, the Temple within the past was desecrated many times as it will be yet in a future fulfillment.

From the current reference point in time, it has been history in the making however, there is yet a future desolation is still to be realized; this necessitates a 3rd Temple. The *End Time* portions of the prophecy of Christ's Return by His own account are specifically associated with the 3rd Temple, the AntiChrist and a *Time of Jacob's Troubles*. Thus, certain *Signs* like eclipses, as they were then are also prophetic indicators of future prophetic events yet to be fulfilled. In the *Olivet Discourse*, Christ extrapolated that certain prophetic events, especially at the end of the *Church Age* were to be corresponding directly with the Sun, Moon and the Stars, thus solar and lunar eclipses. This is exactly what Joel and then reiterated by Peter purported on the 1st Pentecost. This means that prophecy is subject to mathematical time and it is also pegged to astronomical occurrences, etc.

Thus certain eclipses may be a key to discerning what is to come in this *Terminal Generation* per Psalm 150. This study is only suggesting that at least, the mathematical analysis of such an association between the solar eclipses and the *Fibonacci Sequence* as it relates to specific 2014-15 *Tetrad* and beyond should be investigated as each of the total *Blood Moons* of the *Tetrad* occur on the YHVH's Feast Days. This in itself is extremely significant. It may be plausible that one of the eclipses associated with the *Tetrad* or in future *Blood Moon* subject to a *Fibonacci Sequence* could possibly be the start of Daniel's 2520 day count. What is known and verifiable is that the *Tetrad* started on Passover of April 14, 2014 and ends on a *Super Moon* of Sukkot on September 28, 2015.

Thus, this study suggests that based on the examination of the dates of the eclipses, a 2520 day-count of Daniel can be factored in to ascertain a possible prophetic end-date. Several of the end days from the *Tetrad Blood Moons* and particular solar eclipse ended on the Feast Day of Yom Kippur, 2015 and will in 2019 and 2020. Perhaps the *Tetrad* of 2014-15 is somehow associated then with Daniel's 'countdown' to the 'Time of Jacob's Tribulation' and Jesus' return. What is contested among eschatological circles is whether the last prophetic *Week of Years* per Daniel is a literal 7-year period or a prophetic 1 week or 3.5 years. This 1 Week is also constituted on the 360 Jewish calendar day-counts so it will actually be less than the modern 7 years based on the 356 day calendar or what is referred to as the *Gregorian Calendar*. As to whether the 1st 3.5 years have been fulfilled or that erroneously, one is currently in it is for another study.

The Phi Prophetic of Time

Suffice to know that the book of Revelation does give a specific day-count of these prophetic week of years based on the number 7. The question that Bible scholars have grappled with the subject of *End Times* is, if the Tribulation is a single uninterrupted 7-year timespan, then at what point will the 1260 day count commence? Will the 2 *Witnesses* be on the scene at the 'beginning' of the 3.5 years or at the start at the 'midpoint' which is 3.5 years into the 7-year timespan? Will the Rapture start the count? Also, the *Tribulation Period* does not have to immediately commence once the Rapture occurs. There will probably be a transitional period or 'gap' after the Rapture to give enough time for an explanation or the 'Great Lie'. The subsequent Luciferian plans will have time at the beginning be directly implemented through their *New World Order* that is to come to explain away the Rapture event.

This study is only suggesting that the association of all these prophetic events are perhaps associated mathematically an in *phi ratio* at that to the eclipses to the *Tetrad* countdown that itself is in approximate *phi ratio* proportion to the 1949-50 and 1967-68 *Tetrads* and are specifically pegged with the March 20, 2015 total eclipse on the *Spring Equinox*. Based on the solar eclipse pattern, this illustration only seeks to ascertain if this will be a significant date do occur that are related to the *Tetrad*. As it has been noted, the *Tetrad* is just a series of 4 consecutive total lunar eclipses that are called *Blood Moons*. The following are a few examples of events dealing with the End of Days.

- 1) $7 \text{ Years} \times 360 \text{ days/year} = 2520 \text{ Days} / 2 = 1260 \text{ days}$
- 2) *The amount of days that the AntiChrist is to initially reign = 1260 days*
- 3) *The amount of days that the 2 Witnesses have = 1260 days*
- 4) *As a standard of measure then we have $1260 \times 2 = 2520$ prophetic days*
- 5) *3.5 Prophetic Years of 360 days = 360 prophetic days/year divided by 1260 days*

The term 'Blood Moon' comes about because as the Moon is covered by the Sun Disk, the light takes on a red color due to the light bending and shifting to the red zone in the light spectrum. The unique attribute about a *Tetrad*, especially the triple 1949-1967-2014 series is that they corresponded to YHVH's Feast days down to the very day. What is unique about a *Tetrad* is that the *Blood Moons* occur on Passover and Sukkot or Tabernacles in alternating sequence. The argument is though if the *Tetrad Blood Moons* are significant because they also correspond specifically to the nation of Israel. Given the prior historical record of what has transpired in the past during such occurrences in Israel, it cannot be good for Israel.

The mathematical sequence is based on the works of Leonard Fibonacci who lived in the 13th century. The *Fibonacci Sequence* is also referred to as the *Golden Ratio* ϕ . This mathematical ratio has been found to occur in many forms within nature, basically in all of Creation. Thus prophecies applied with this mathematical sequence could show a relationship between when a particular place and time of one event will relate to the other. The *phi ratio* is seen even in the Solar System and in all created things. It is also called the 'Signature of the Creator', etc. For example, if the Moon were to be in a circular orbit close enough to the Earth and in the same orbital plane, there would be total solar eclipses every single month.

Celestial Patterns of Prophecy

The Earth's orbit is called the *Ecliptic Plane* because the Moon's orbit must cross this in order for an eclipse, both solar as well as lunar to occur. The Sun's distance from the Earth is about 400 times the Moon's distance. Amazingly, the Sun's diameter is about 400 times the Moon's diameter. Because these ratios are approximately the same, the Sun and the Moon, as seen from Earth, appear to be approximately the same size; about 0.5 degree of arc. The Moon's orbit is angled at more than 5° to the earth's orbit around the sun so its shadow at a *New Moon* often misses the Earth. The Moon's actual orbit is elliptical, often taking it too far away from the Earth so that its apparent size is not large enough to block the Sun totally. The orbital planes cross each year at a line of nodes resulting in at least 2, and up to 5 solar eclipses occurring each year. No more than 2 of the eclipses can be total eclipses.

Total solar eclipses are rare at any particular location because they occur only along a narrow path of the Earth's surface traced by the Moon's shadow or *Umbra*. The frequency of the 4 eclipses within the Tetrad, on the other hand is more dramatic and intense. They have a huge range, almost at the opposite *Poles* of the Earth. Indeed, the *Fibonacci Sequence* seems to be the 'Signature' of YHVH; it is the 'thumbprint' of Christ. Perhaps even the very WORD of GOD and utterances could be subject to this property. To reiterate, what this study strongly suggests however is that prophecy itself occurs in a *phi ratio* sequence. In recent years, for example the solar eclipse of April 28, 2014 and September 13, 2015 were almost identical in symmetry when projected onto the Earth. They both occurred at the *South Pole* region of Antarctica.

The 2 center solar eclipses of October 23, 2014 and March 20, 2015 within the *Tetrad* mirrored each other's path and both occurred on the *Northern Hemisphere*, North America and Europe. In Europe, it occurred from Iceland to Jerusalem. Perhaps this is a prelude to when 'Darkness' will beset the kingdom of the AntiChrist due to this total eclipse on the *Spring Equinox* or be another 'heavenly body' that blocks out the Sun during the *Tribulation Period*. What could start the *Tribulation Period* is a geo-political decree. The only such decrees made were during Yom Kippur starts on the 10th Day in the month of *Tishrei*. However other 'Royal Decrees' have been made during Passover as was the *Decree of Cyrus* to liberate the Jews and give permission to re-build the Temple in Jerusalem.

As to Yom Kippur, this LORD's Feast is also known as *Day of Atonement* when the *Year of Jubilee* would be proclaimed. Will the coming AntiChrist as such a time proclaim a similar 'decree'; of his *New World Order* perhaps? It is the holiest and most solemn day of the year for the Jews. Its central themes are repentance and atonement. The word Kippur comes from a root word that means 'to cover or hide'. There is also a link of Yom Kippur to the word *kapporet*. Yom Kippur completes the period known as the 'High Holy Days' or *Yamim Nora'im* or the *Days of Awe*. With regards to the coming AntiChrist, it will be a time of 'Awe' as deceptively, Israel will be accepting this 'Man of Sin' that comes in 'his own Name', etc. As noted, what is peculiar about this Feast in regards to the other 6 Feasts of YHVH is that the *Year of Release* or 'Jubilee' is proclaimed on Yom Kippur.

Many *End-Time* students of prophecy speculate that 5776 coincides with the *Jubilee Year*. This is based on the 49th year count from the liberation of Jerusalem in 1967. Others content it is 2017-18 based on the *Religious New Year* count from Nissan to Nissan and not the *Civil New Year* of the Fall with the Feast of Tabernacles. Yom Kippur is also directly associated with the *Ark of the Covenant*. The word *Kapporet* means the 'Mercy Seat' or the slab that covered the *Ark of the Covenant*. Perhaps one of these eclipses will in somehow be associated with the disclosure of the literal *Ark of the Covenant* that is to be place in the 3rd Temple at some point in time that might correlate with the *Jubilee Year* in some way. Perhaps at the end of the cycle this event could correlated with some future *Blood Moon* as well; this would be amazing.

This piece of furniture is the only item that has not been replicated by the *Temple Institute* in Jerusalem in preparation for the 3rd Temple. This Ark constructed by Moses on *Mt. Sinai* after the *Exodus* of Israel from Egypt. Based on some interpretaions of the *End Times*, this same *Ark of the Covenant* will be the 'throne' on which the AntiChrist will defile it by sitting on it as he proclaims himself 'god' and demands worship from Israel specifically and the whole world in general from the 3rd Temple in Jerusalem. This is the 'Abomination of Desolations' that Daniel spoke about by some measure of prophetic interpretation and will occur in some fashion in *phi ratio* of time yet to be determined. If Christ referenced such prophetic event with eclipses, perhaps then the Rapture or the 'Sudden Destruction' will be accompanied by some celestial event like an eclipse.

The book of Revelation also synchronizes many events to specific earthquakes, solar and lunar eclipses. Thus, using the *Fibonacci Sequence*, it appears that the total solar eclipse in the 'midst' of the Tetrad could serve as reference points for very important prophetic events yet to be determined. This is not to say that the Rapture or the 2nd coming of Christ has to be affiliated with any type of eclipse or mathematical law, but Christ Himself stated in the *Olivet Discourse* that they would be at some point in time based on prior prophetic patterns like the *Abomination of Desolations* spoken by Daniel for example. For this study, however the mathematical calculations have been speculative. Perhaps even the Rapture of the *Bride of Christ* might coincide with a mathematical *phi ratio* of time or an eclipse that will act as 'precise and punctual' annotation in the celestial prophetic clock of the Creator.
