

Workshop Description

This workshop is designed for clinicians and professionals who work with children and adults with cleft lip and/or palate and associated craniofacial syndromes. The workshop will deliver information on the etiology of craniofacial anomalies and provide practical information and ideas to assist with assessment and treatment. A hands-on learning approach will be used.

Learning Outcomes:

After completing this session, participants will be able to:

- Attendees will be able to identify assessment tools helpful in evaluating velopharyngeal dysfunction.
- Attendees will be able to identify intervention plans and ideas helpful in treating velopharyngeal dysfunction.
- Attendees will be able to identify the gestational timeline of the face and palate with reasons why a cleft lip and/or palate may have formed in utero.
