COVID PANDEMIC 2020

We are excited to announce that gymnastics studios have been given the green light to reopen! Jump! will be opening our doors back up on June 1, 2020. We are committed to exceeding all standards set forth for our industry for sanitation and social distancing and to offering every person (parent client, student and instructors) an option to enjoy the sport of gymnastics at their comfort level as we all have our own path of readiness to enter this new world we are experiencing.

If you will be attending classes on site, please read the following guidelines thoroughly

● PRECAUTIONS:

- All staff will be tested for COVID-19 before reopening date and have their temperature taken daily before their shift.
- Occupancy will be reduced to 25% capacity (Four students per class with 3 classes at a time and viewing limited to 6 parents at a time.)
- Hand sanitation stations will be set up every 30 feet inside the facility and coaches will sanitize their hands after spotting a child.
- Disinfectant wipes will be set up at each event in the gym and surfaces wiped between groups rotating.
- We have switched to MERV-13 air filters and they will be changed weekly.
- SPOT TV will be installed to give parents the ability to watch class from their smart device. If parents need to come inside, masks and 6' of social distancing are mandatory.

● PROCEDURES

- Students are to arrive dressed for class and only bring a water bottle inside (water fountains will be closed). If your child is over the age of 6, they must wear a mask to class.
- Upon arrival to the facility, students will line up outside on their colored dot (before opening day, they will be assigned a color), take their shoes off and leave them against the outside wall. The admin will take each person's temperature before entering.
- As students enter, they will set their water bottle on their assigned dot on the bench and enter the gym to sit on their yoga mat with their assigned dot on the warm up floor. (The use of yoga mats will allow us to wipe this surface and keep students 6' apart.)
- Every rotation will have the same 4 colored dots, spaced 6' apart. Students will stay at their station the entire event. After the students finish the event, it will be wiped down before the next group.
- Instructors will set up activities that children can do independently to reduce spotting. When they do need to spot a child, they will sanitize their hands afterwards.
- We will be suspending stamp time at the end of class and the bye bye circles and chants.
- After class, instructors will walk children outside and reunite them with their parents.
- All common areas and gymnastics equipment will be disinfected between each group of classes.
- We will HAVE FUN and LEARN!

Can't wait to see everyone!
