

COMMAND CENTER ADD-IN SMART TRAILER

At **ABSOLUTE CONTROL, LLC**, we provide quality equipment designed with our customers specific needs in mind. Quality and customer service are the foundations on which Absolute Control was established and we pride ourselves with delivering control systems that are worthy of carrying the Absolute Control name.

22" HMI TOUCH SCREEN

- Swing arm or Wall mounted
- Displays up to six pressure, two temperature, four tank level/flow rate, and six choke position.
- Expandable to display valve position and any other inputs from SCADA units or other instrumentation.

SENSORS

- 2" 1502 Male or 1/4" NPTM pressure sensors available to integrate into existing trailer
- GWR tank level sensors available in any length up to 20'
- Clamp on temperature sensors
- Choke position sensors available upon request
- Valve position Sensors available upon request

PLC

- Wall mount enclosure
- Battery back-up providing 20 minutes of run time
- Wi-Fi/Cellular/Satellite communications available
- Data logging
- Remote tablets available
- Web view of real time data available

Our Engineering, Operations and Sales staff have years of experience in drilling and completions. We have operated and installed control systems for decades and use that experience to continually improve the design of our control systems and make them more user friendly and efficient. We also use this experience to help our customers design control systems to meet or exceed their requirements. Our control systems are available to meet the following requirements: **API 16C, CE, ATEX, IEC, NORSOK, GOST, etc.** We can also supply control systems with third party design review and or witness testing, **ABS, DNV, Lloyds, Bureau Veritas, etc.**
