

# SUKKOT SUPER MOON ECLIPSE

## LAST BLOOD MOON OF THE TETRAD

*The End and Last Gathering in of the Harvest*

*'6 days you shall work, but on the 7th day you shall rest. In plowing time and in harvest you shall rest. You shall observe the Feast of Weeks, the firstfruits of wheat harvest, and the Feast of Ingathering [Sukkot] at the year's end. 3 times in the year shall all your males appear before the LORD GOD, the GOD of Israel. For I will cast out nations before you and enlarge your borders; no one shall covet your land, when you go up to appear before the LORD your GOD 3 times in the year.'* – Exodus 9:21-24

This study along with the online charts are an approximate depiction of the solar system at the time of the Sukkot Super Moon eclipse on September 28, 2015. This very profound celestial event will conclude the 2014-15 series of the 4 Blood Moon Tetrad.

The year 2015 has seen an extraordinary degree of amazing celestial convergences. It was noted by NASA's telescope aimed at the Sun that in effect the Rosh HaShanah partial solar eclipse event consisted of 3 sequential eclipses from that vantage point. Also there were the Blue Moon and the triple sequence of Super Moons. This last Blood Moon lunar eclipse will also be the last of the 2015 Super Moons. The Blood Moon will occur in Pisces from Earth's perspective opposite Leo.

Of possible interest is the observation that Mars was in direct conjunction with Regulus in Leo on Yom Kippur. Prior to that on Rosh HaShanah, the Mars-Regulus-Jupiter alignment crowned Leo in the Giza Pyramid reflection on Earth. There are those that subscribe to an apocalyptic interpretation that Mars in Regulus on Yom Kippur speaks of a possible ominous sign of war against Israel. This already has historical precedence as the Muslims did simultaneously attack Israel on Yom Kippur in 1973. This Blood Moon is just 3 days after the 49th Jubilee cycle. The Yom Kippur War was exactly 7 years from 1966, the start of the prior 49th Jubilee cycle and that led to the liberation of the Temple Mount, not the City of David. The argument is that the Roman fort occupied the Threshing Floor of Ornan the Jebusite.

Since the Western Wall still has the massive stones, some believe that it could not have been what Jesus referred to as 'not one stone left upon the other'. However, the Fortress Antonia was taller than the Temple and complex to have a bird's eye view of the activities in case of insurrection and rioting. This is attested to the fact that they 'came down' to arrest Paul as he made a commotion when he brought non-Jewish Disciples to the Temple Mount. Then, the LORD and the Disciples were specifically referencing the Temple itself, not the entire Temple Mount. The Romans did in fact tear down every block of the Temple. Lastly Jesus entered the Golden Gate across the Kedron Valley opposite the Mount of Olives, not the City of David.

## **The Sign of Pisces?**

The 1st chart illustration will show how the Sukkot Super Moon eclipse will approximate its position celestially on September 28, 2015. In this rendition the angle is from the perspective of the Earth being in-between the Sun as the constellation Pisces is in the backdrop. The 2nd chart illustration will show the Blood Moon eclipse with Leo as the backdrop. What is unique about the Pisces alignment is that the planet Uranus is on the Ecliptic at the Band of the Fish that rides the back of Pegasus. This Pegasus is seen to some as part of the 'Celestial Rapture' as how he comes to 'rapture' or have Andromeda depart. In the Bible, the New Testament is especially rich with the inference that the Disciples of Jesus Christ and the Church Age has been symbolized by the Fish or Pisces, i.e., the Age of Pisces and Virgo.

In fact the 4 Blood Moon of the Tetrad have alternated in only 2 specific constellations, Pisces and Virgo. Both are the primary symbols of the Church Age as the 'Andromeda' which is the chained woman will one day be the crowned Cassiopeia next to the King at the center of the Galaxy. The last Super Blood Moon of the Tetrad of 2014-15 will occur on the Ecliptic just to the right of Uranus. According to NASA, the next Tetrad to occur is in the year 2032-2033. Apparently the dates will not coincide to the High Holy Feast Days of Passover and Sukkot. There is only one other Total Lunar Tetrad on all four feast days in the 3rd millennium after Christ in 2582-83.

<i>Date</i>	<i>Maximum</i>	<i>Type</i>	<i>Saros</i>	<i>Umbral Duration</i>	<i>Eclipse Duration</i>
2032 Apr 25	15:14:51	Total	122	1.191	03h31m-01h06m
2032 Oct 18	19:03:40	Total	127	1.103	03h16m-00h47m
2033 Apr 14	19:13:51	Total	132	1.094	03h35m-00h49m
2033 Oct 08	10:56:23	Total	137	1.350	03h22m-01h19m

## **The Maximum**

The point of total eclipse Maximum will occur just off the coast of Brazil near Sao Luiz. The eclipse will be seen primarily from the Middle East to the Atlantic coast of the USA. The illustration will show the Celestial Coordinates of the Mazzaroth or Zodiac for a better appreciation of the positioning and depiction. The 2nd chart illustration is taken from the approximate vantage point of the Earth being in between the Sun and the Moon. The reason why the Moon appears to turn 'Blood Red' during the eclipse is that at the Moon enters the back side of the Earth.

The shadow portion allows for the light to bend off the Earth and the refraction of the red spectrum of the visible light is delineated and magnified more than usual. Also when the eclipse happens worldwide lunar eclipses look approximately the same all over the world and happen at the same time. The Following are some other observations regarding this final Blood Moon of the Tetrad. According to NASA's calculations, the total duration of the eclipse is 5 hours, 11 minutes. (511) The total duration of the partial phases is 2 hours, 8 minutes.

The duration of the full eclipse is 1 hour, 12 minutes. (72 min) The number 72 is a fractal of the 72 degrees of the Precession of the Equinox, and a full measure of a type cycle being completed. Total duration of the eclipse is 5 hours, 11 minutes. (511) Total duration of the partial phases is 2 hours, 8 minutes.

<b>Event</b>	<b>UTC Time</b>
<i>Penumbral Eclipse begins</i>	<i>Sep 28 at 12:11 AM</i>
<i>Partial Eclipse begins</i>	<i>Sep 28 at 1:07 AM</i>
<i>Full Eclipse begins</i>	<i>Sep 28 at 2:11 AM</i>
<i>Maximum Eclipse</i>	<i>Sep 28 at 2:47 AM</i>
<i>Full Eclipse ends</i>	<i>Sep 28 at 3:23 AM</i>
<i>Partial Eclipse ends</i>	<i>Sep 28 at 4:27 AM</i>
<i>Penumbral Eclipse ends</i>	<i>Sep 28 at 5:22 AM</i>

### **The Phi Ratio Factor**

There is also another unique observation that involves the layout of the entire Solar System during this Sukkot last Blood Moon eclipse of the Tetrad. When looking at the Solar System from a top view, the following observations are noticed. First of all, all the 4 Giant Gas plants of Jupiter, Saturn, Uranus and Neptune are square to each other. This forms a 'square' or more precisely a rectangle that delineates the area with the Sun in approximate phi ratio of distance and time from the Jupiter Saturn edge to the Uranus-Neptune edge. At this approximate phi ratio conjunction of the Sun, the Earth is part of a triangle alignment with Mercury and Venus. This is just another of the amazing symmetry and mathematics involved with the clockwork of the Sun, Moon and the Stars that testify of the Creator's intelligent design.

Another very interesting observation related to the phi ratio phenomenon concerns Pisces, Uranus, the point of the maximum eclipse and Neptune from the perspective of the Sun. With Pisces, where the Bands of the 2 Fish meet to the Head of Pisces is in approximate phi ratio to there the Blood Moon eclipse will occur on the Ecliptic. Lastly the position of the 2 plants, Uranus and Neptune are in approximate phi ratio to this same spot or 'X' that marks the spot of the last Blood Moon of the Tetrad. The spiral delineation will be used in the charts for a more highlighted illustration in denoting these mathematical relationships seen in cosmology.

If there is any prophetic or cosmic significance of this planetary composition well remain to be seen. What is amazing to consider is that the when using the phi ratio spiral for a better visual effect, the spiral focal point coincides with the position of the Sun. In turn, the phi proportion is delineated by the position of Mercury precisely and the termination point ends with where Uranus is at. In relation to this alignment, it is Uranus that accompanies the last Super Blood Moon on Sukkot in Pisces. This application of the phi ratio to this composition of the Solar System from the top view is just another facet of the theory that the phi ratio. It is seen in prophecy and in the time-space continuum that even involves the planetary alignments on such a time and place for the last Tetrad and 7th and final Feast of YHVH for the year and perhaps for the Piscean Age.

## **Booths or Tabernacles**

Sukkot is the last of the 7 High Holy Feasts. It is one of the three Pilgrim Festivals or High Holy Feasts that are obligatory for every man of Israel 20 years and older to attend and offer worship at the Temple in Jerusalem. The Feast is celebrated on the 15th day of the month of Tishrei. What is ominous perhaps is that this last Super Blood and last Blood Moon of the Tetrad occurs on Sukkot, the last of the 7 High Holy days of YHVH. What is amazing about Sukkot is that it is pattern by a multiple level of typology. The Feasts are mirrored by the LORD YHVH Himself to be a pattern of Creation and the 7 day week and the Menorah pattern even.

Sukkot is also thus corresponds to the Sabbath as in the rest as the Bride that has been laboring in the wheat and barley fields and the vineyard of the Church Age as it were. They are to be called at some prophetic point in time, in-gathered as the harvest itself at the end of the year perhaps. This is patterned after YHVH rested on the 7th Day, the last day. The Feast is the in-gathering and marks the end of the harvest. Will it be or can it be thus also a type of the spiritual one?

What is also unique about this Sukkot proclamation of YHVH from Exodus 32 is that in keeping this Feast, this in-gathering, the LORD promised that He would expand Israel's geographic and/or political border lines. What is noticeable about these Fall Feasts is that they are subject to the Jubilee years primarily of 1917-1967-2015 but precisely since the Temple Mount was liberated. YHVH has literally expanded Israel's borders instead of the nations like the USA, the EU, UN, the Pope and the Palestinians that are attempting to divide and shrink Israel's borders.

Could these be the 'Many' that will be the players that will sit at the table to 'Confirm the Covenant', i.e., the Oslo Accords perhaps? It has been the case that 'The Many' have and are presently trying to divide the land if not to pledge to totally destroy Israel as the conspirators of Psalm 83 plan to do. This has been the case in every Muslim war that as the Fig Tree, Israel as not only 'budded' but grown and expanded its borders since Israel was birthed in a day. Is it the case that since 1948 Israel as a nation once again has observed the Feasts? Can it be the case that as the possible Isaiah 17 and Psalm 83 War occur Israel will instead expand its borders?

The year 5776 has begun and the Luciferian's great expectation of it being the 'Year of Lucis or that of Lucifer started out with near total darkness instead. The LORD is working and will not be mocked. How interesting that on Rosh HaShanah, the start of the 'Year of Light', of Lucifer the whole of the Middle East was blanketed by the worst sand storm on record and it became dark as night instead. And then there was the tragic lighting strike on the crane in Mecca by that other freak storm on 9-11. Then that specular rainbow appeared on the site of the other towers that were taken down in Ground Zero. Many believe that perhaps that was the 7 day warning or a foreshadowing to 'get in the Ark' much like Noah was told to enter the Ark 7 days prior to the Flood of judgment but in reverse? Perhaps.
