

American Petroleum Institute
Recommended Practice 1173

We can help you assess your work processes and organization against API RP 1173, then work with you to make necessary changes to put focus toward the recommended practice.

Amy Stoodt participated in the review and comment period for development of the RP as well as having experience integrating the RP to an Operational Excellence Strategy.

Our skill sets match the key components of RP 1173 that begin in the document with Part 4:

- Part 4 - Safety Management
- Part 5 - Leadership and Management Commitment
- Part 6 - Stakeholder Engagement
- Part 7 - Risk Management
- Part 8 - Operational Controls
- Part 9 - Incident Investigation
- Part 10 - Safety Assurance
- Part 11 - Management Review and Continuous Improvement
- Part 12 - Emergency Preparedness and Response
- Part 13 - Competence, Awareness and Training
- Part 14 - Documentation and Record Keeping

Let us help you with each of the above Parts and culminating with Part 15, which is the execution of a Pipeline Safety Management System.
