

## Dado Joints (Also known as Housing Joints or Trench Joints)

Dado

A Dado is a slot cut into a piece of wood.

A Dado joint is an ideal joint for creating shelving or dividing sections in a piece of furniture

The depth of the Dado should be between  $\frac{1}{3}$  to  $\frac{1}{2}$  of the thickness of the piece of wood being cut

Use the Router and the Dado Cutting JIG to cut this joint
