ALCOHOL AND CRIME IN WYOMING:
2009-2010

September 2010

This evaluation project was conducted by the Wyoming Association of Sheriffs and Chiefs of Police with Federal 402 Highway Safety funds received from a grant from the Wyoming Department of Transportation - Project No. HSO2010. The Project was managed by Johnson and Associates of Douglas, Wyoming. The report was authored by Ernest L. Johnson, Director of Services.

EXECUTIVE SUMMARY

This report contains alcohol-related information collected in all twenty-three counties in Wyoming during a twelve-month time period (July 1, 2009 through June 30, 2010) by the Wyoming Association of Sheriffs and Chiefs of Police. Information was collected from a total of 18,863 persons who were arrested and subsequently detained in a county detention facility. The alcohol-related arrest data contained in this report provides a detailed, statistical picture of the impact of alcohol abuse on crime in Wyoming.

This Executive Summary highlights a few of the significant findings contained in this report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public; however, a careful review of other relevant findings and statistics contained in the main body of this report is essential in order to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

The profile of the average person taken to jail in Wyoming was relatively consistent with previous years. Eight out of ten times it was a male – average age 33. Ten percent of the time it was an out-of-state visitor and 5.5% of the time it was an in-state visitor.

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be “serious” crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). Felony arrests accounted for less than 7% of the total arrests statewide.

Almost eighty percent of the 18,863 arrests statewide involved alcohol and/or other drugs. A closer review of the statistics indicates that alcohol is the drug which continues to have the greatest influence on crime in Wyoming. The high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content recorded for this twelve-month reporting period equals or surpasses the statistics that have been recorded during each of the previous three years¹. The statistics for alcohol involved arrests, public intoxication and DUI arrests have continued to show an upward trend every year for the last four years.

Although Wyoming is relatively “safe” from what is generally considered to be serious crime, the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested represent a real and significant threat to public safety.

Listed below are a few of the significant findings in this report.

- Alcohol was involved in 72.09% of all custodial arrests.

¹ Alcohol and Crime in Wyoming 2006-2008, Wyoming Association of Sheriffs and Chiefs of Police, May 2009

Executive Summary (continued)

- Alcohol was involved in 75.44% of all misdemeanor arrests.
- Arrests for public intoxication accounted for 13.5% of all arrests.
- The average blood alcohol content for persons arrested for public intoxication was 0.22.
- Methamphetamine was involved in 2.5% of the 18,863 reported arrests.
- “Other drugs” were involved in 9.5% of the reported arrests.
- Driving under the influence arrests accounted for 36.41% of all arrests.
- The average reported blood alcohol content for DUI arrests statewide was 0.1525.²
- 46% of persons arrested for DUI had a reported BAC level above 0.16; and 7% had a BAC of 0.240 or greater.
- The average reported BAC for 1260 females arrested for DUI was 0.153.
- The average reported BAC for 4,564 males arrested for DUI was 0.152.
- 85.4% of the traffic crashes resulting in an arrest involved alcohol.
- The average reported BAC for 615 persons who were arrested for DUI after being involved in a traffic crash was 0.1684.
- The age group (in 5-year increments) with the highest percentage of DUI arrests was age 21-25 (19%), followed by age 26-30 (15%) and 31-35 (11%).
- Juvenile arrests that resulted in detention in a county detention facility accounted for less than 2% of the total custodial arrests.
- Alcohol was involved in 50% of the juvenile arrests.
- Drugs were involved in 17% of the juvenile arrests.
- Underage DUI arrests accounted for 7.6% of all DUI arrests.

² In Wyoming, a person driving with a blood alcohol content of 0.08 is legally presumed to be impaired.

Alcohol and Crime in Wyoming - 2009/2010

Executive Summary (continued)

- Average reported BAC for 450 juveniles arrested for DUI was 0.1241
- Average reported BAC for 599 juveniles arrested for MIP was 0.1367

In order to grasp the significance of these statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour in order to achieve a BAC of 0.15 – a female weighing 120 pounds would have to consume five drinks in one hour. Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of this report for information about the level of impairment for other body weights and drinks consumed.

The statistics in this report provide evidence of the high level of alcohol abuse statewide. The high percentage of alcohol involved arrests (72.09%), the inordinate number of arrests for public intoxication and DUI and the high levels of BAC recorded for these individuals (average BAC: 0.22 for public intoxication and 0.1525 for DUI) appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey³.

This report includes statewide statistics and averages, along with comparisons of county statistics in specific categories. In addition, there are approximately one hundred pages of data included in a supplemental report that provides county, community and local law enforcement agency specific statistics. A careful review of both reports is essential in order to gain a more complete perspective of the impact of alcohol on crime in all communities in the state of Wyoming.

This executive summary provides just a few highlights from all the data that is included in this report. The statistics contained in this report identify significant public safety issues which hopefully will prompt further discussion, analysis and action by local law enforcement, citizens and state/community leaders.

³ Wyoming Alcohol Use Issues Survey, Wyoming Survey & Analysis Center, October 2006

INTRODUCTION

The Wyoming Association of Sheriffs and Chiefs of Police has been collecting and evaluating alcohol-related arrest data in Wyoming since 2005. This effort was initiated by the Association and has been funded by the Wyoming Department of Transportation – Highway Safety Program since its inception with the expressed purpose of formulating effective enforcement strategies aimed at reducing the number of alcohol related crimes and traffic crashes in Wyoming.

A baseline of alcohol-related arrest data was established for a six-month time period (April 1 through September 30) in all twenty-three counties as a result of the collection efforts in 2006. Data was collected for a twelve-month period (October 1, 2007 through September 30, 2008) after receiving supplemental funding assistance from the Substance Abuse and Mental Health Services Division – Wyoming Department of Health. The process for collecting the data has been refined each year since inception to ensure more complete and accurate reporting. The data fields selected for collection and analysis have been standardized as well.

This reporting period included a data field that had not been collected previously – the residency status of the person being arrested. This information can be found in the chart labeled Statewide Arrests – Demographics.

Although the data fields and the process for collection have been standardized and relatively consistent for the past five years, the time periods for collection and reporting have not. This was due mainly to the timing and availability of grant funding; however, this inconsistency in reporting periods have made it difficult to compare statistics year-to-year or with the state traffic crash data. Plans are underway to change and standardize the collection/reporting period beginning next year on a calendar year basis – January through December.

The information collected from a total of 18,863 persons who were arrested and subsequently detained in a detention facility in the participating counties during the twelve-month project period (July 1, 2009 through June 30, 2010) confirmed what law enforcement officers who patrol the highways and who respond to calls for service in Wyoming already know from experience – that alcohol is a major contributing factor in situations that result in someone going to jail. The following section of this report provides a few of the noteworthy alcohol-related statistics and findings.

SIGNIFICANT STATISTICS AND FINDINGS

The high percentage of alcohol-involved arrests in Wyoming, the inordinate number of arrests for public intoxication and driving under the influence, and the reported high level of blood alcohol content equaled or surpassed the statistics recorded during each of the previous three years. The statistics contained in this report identify serious public safety concerns which hopefully will prompt further discussion and analysis by local law enforcement, citizens and state/community leaders.

Detailed charts and graphs of this data are provided in the Data/Statistics section of this report. The number and percentage of arrests are provided for every listed category of concern on a statewide basis, as well as by county and by law enforcement agency for more in-depth comparison purposes. Listed below are a few of the noteworthy alcohol-related statistics and findings in this report.

- **Alcohol was a factor in 72.09% of the custodial arrests in Wyoming.**
 - Counties with significantly higher statistics:
 - Big Horn – 83.20%
 - Albany – 85.58%
 - Crook – 94.17%

- **Alcohol was involved in 75.44% of the misdemeanor arrests.**

- **Arrests for Public Intoxication accounted for 13.5% of all arrests statewide.**
(The statewide average does not include 1,749 persons who were admitted into the Fremont County Alcohol Crisis Center for public intoxication)
 - Counties with significantly higher statistics:
 - Natrona – 17.43%
 - Teton – 29.28%
 - Fremont – 29.97%

- **The average blood alcohol content for all persons arrested for public intoxication was 0.22.**

- **Methamphetamine was involved in 2.5% of the 18,863 arrests statewide.**
 - Counties with significantly higher statistics:
 - Uinta – 4.52%
 - Lincoln – 4.76%
 - Sweetwater – 6.04%

Significant Statistics and Findings (continued)

- **“Other” drugs were involved in 9.51% of the reported arrests statewide.**
 - Counties with significantly higher statistics:
 - Sweetwater – 17.91%
 - Washakie – 18.34
 - Converse – 18.7%
 - Carbon – 21.35%

- **Driving under the influence (DUI) arrests accounted for 36.41% of all arrests statewide.**
 - Counties with significantly higher statistics:
 - Crook – 70.87%
 - Weston – 59.21%
 - Albany, Big Horn, Campbell, Goshen, Lincoln, Platte, Sheridan, Sublette all were 50% or above

- **The average blood alcohol content (BAC) reported for 5,946 persons arrested for driving under the influence statewide was 0.1525**
 - Counties with significantly higher statistics:
 - Niobrara - 0.1608
 - Fremont - 0.1650
 - Hot Springs - 0.1860

- **46% of the persons arrested for driving under the influence had average blood alcohol content above 0.16.**
 - 7% had a BAC of 0.24 or greater
 - 13% had a BAC between 0.20 and 0.239
 - 26% had a BAC between 0.16 and 0.199

- **The average BAC reported for 807 traffic crashes that involved alcohol was 0.1684.**

- **8% of all persons arrested for driving under the influence (DUI) were under the age of 21.**

- **Juveniles accounted for 1.6% of the arrests statewide.**
 - It should be noted that the data in this report does not represent a complete accounting of juvenile arrests as these arrests often do not result in detention in a county facility.

- **50% of the juvenile arrests involved alcohol.**

- **Less than 1% of the juvenile arrests involved methamphetamine.**

- **17.13% of the juvenile arrests involved “other” drugs.**

Significant Statistics and Findings (continued)

- **424 minors arrested for alcohol-related offenses reported obtaining alcohol at:**
 - Party – 38%
 - Home – 28%
 - Bar – 16%
 - Liquor Store – 17%
 - Drive-up – 1%

PROJECT DESIGN AND IMPLEMENTATION

The Wyoming Association of Sheriffs and Chiefs of Police contracted with Johnson and Associates, a Wyoming based management consulting firm, to manage and staff this project – to create the master database, to collect and input data, to make presentations to select groups and to author the final report. The Association had also contracted with Johnson and Associates to manage and staff the previous projects in 2005, 2006, 2007, 2008 and to conduct a three-year trends analysis in 2009.

A task force comprised of administrators and detention facility personnel from each of the county law enforcement agencies involved in the initial data collection efforts in 2005 determined the scope and intent of the project and provided specific direction for its implementation. In the following years, all law enforcement and detention facility administrators in the state were involved in deciding the appropriate fields for collection of data, selecting the subject areas that would be targeted for analysis and refining the process and procedures for collecting the information.

A supply of reporting forms and self-addressed stamped envelopes were provided to all detention facilities in the state - along with an instruction sheet for processing the completed reporting forms. In addition, all detention facility personnel who were assigned the responsibility to oversee their agencies' data collection were provided individual orientations. All completed reporting forms were submitted to Johnson and Associates for data entry on a weekly basis.

The master database for this project was created using Microsoft Access in a manner that will allow “harvesting” of additional information in the future should a need or particular area of interest arise. The data in this report is presented by “county” and by “department,” by actual numbers and percentages, and by various categories of interest. The information was assembled in this manner in order to assist law enforcement administrators, as well as community leaders, to better analyze the information and to facilitate follow-up inquiries of notable concerns.

DATA COLLECTION

A one-page reporting form consisting of fill-in or checked boxes was constructed and refined during the course of this project. It is estimated that the form requires the booking and/or arresting officer two-to-three minutes to fill out during the book-in process. Specific information that was collected during the book-in process include: type of offense, whether alcohol was involved; whether drugs were involved; location of last consumption and point of sale; known blood alcohol content levels for arrests involving public intoxication, driving under the influence and minors in possession; and demographic information. (Please refer to page 39 for a sample of the reporting form)

Data Collection (continued)

A total of 18,863 reporting forms were submitted by the twenty-three county detention facilities and the Fremont County Alcohol Crisis Center during the twelve-month data collection period July 1, 2009 through June 30, 2010. Although officers were instructed to complete a form for every person booked into the detention facility, they did not always do so. An independent review of department book-in records revealed that there were a total of 21,161 persons booked in to all detention facilities during that period – for a statewide reporting average of 89.14%. (Please refer to page 38 of this report for the monthly comparison of reports received to actual arrests - and for a listing of all county reporting percentages) Only “field” arrests resulting in a person being booked into a detention facility have been tabulated – these reported “field” arrests totaled 18,863.

DATA /STATISTICS

All information contained in the reporting forms that were submitted by the participating counties was entered into a master data base by week and by month. This information was subsequently assembled by category, by county, and by department in order to facilitate appropriate comparisons and further analysis.

A detailed breakdown of information for each county is available in a separate Supplemental Report.⁴ A sample of the county statistics is included in this report. Natrona County was selected as the sample to be included as this county generated the greatest number of arrest statistics.

The alcohol-related arrest data in this report is presented in a series of tables and graphs:

- ❖ Tables – Number of Arrests and Percentages
- ❖ Pie Chart – Methamphetamine, Alcohol and Other Drugs
- ❖ Tables – Felony/Misdemeanor Arrests Involving Alcohol
 - Alcohol Involvement by Category of Arrest
- ❖ Bar Graphs – Alcohol Arrests Percentages, BAC
- ❖ Pie Graphs – DUI, BAC, Traffic Crash Statistics
- ❖ Tables and Bar Graphs – Juvenile Statistics
- ❖ Pie Graph – Juvenile Demographics, Where Minors Obtain Alcohol
- ❖ Table – Natrona County Statistics (Sample County Statistics)
- ❖ Table – Total reports compared to Actual Custodial Arrests

⁴ A PDF of this Supplemental Report can be downloaded from the following websites: <http://wascop.com>

Statewide Arrests July 1, 2009 - June 30, 2010

Numbers by Department

County	Total Offenses	Misde-meanor	Felony	Domestic Violence	Resist Arrest	Assault	Public Intox	Alcohol Involved	Drugs Involved

ACKNOWLEDGEMENTS

This project was accomplished due to the committed support of all the law enforcement administrators in Wyoming, and in particular, the Sheriffs' generous commitment of agency resources. The day-to-day supervision and weekly submittal of the project reporting forms and the individual efforts of the hundreds of arresting/detention officers who filled out the reporting forms should be acknowledged as well. Their collective efforts were absolutely essential to the overall success of this project.

2009-2010 - EVALUATION OF ALCOHOL FACTORS IN CUSTODIAL ARRESTS

Laramie County Sheriff's Department

OFFICER or CR NUMBER _____ DATE _____

The following information is being collected in an effort to evaluate alcohol factors in custodial and DUI arrests in all twenty-three counties in Wyoming. This data will be collected for a period of 12 months (July 1, 2009 through June 30, 2010) and will be used for statistical analysis purposes only. Please fill out a separate form for every person being booked into your facility.

Please fill in the information based on your knowledge of the case, personal observations, and/or questioning of the person arrested. The person should be advised that no case sensitive information is being recorded and that this information is being collected for statistical purposes only. A copy of the final report will be provided to every participating agency. Thanks for your help.

DEPARTMENT (Circle agency affecting arrest; if agency is not listed please fill in "Other")

DRIVING IMPAIRED
AC = .05% - .07%

Subtract .01% for each 40 minutes of drinking.
One drink is 1.25 ounces of 80 proof liquor,
12 ounces of beer, or 5 ounces of table wine.

LEGALLY INTOXICATED
AC = .08% AND UP

NOTE: PERSONS UNDER THE AGE OF 21 CAN FACE CRIMINAL PENALTIES IF CAUGHT DRIVING WITH A DETECTABLE ALCOHOL CONCENTRATION OF 0.02% OR MORE.

* Guide developed by J.Anderle, Laramie PD and Mike Moore, Wyoming Chemical Testing

WYOMING'S ALCOHOL IMPAIRMENT EDUCATIONAL GUIDE

FEMALES - APPROXIMATE ALCOHOL CONCENTRATION (AC) PERCENTAGE

Estimates based on physically fit adult females who consume the alcohol over a one hour period.

RELATED EDUCATION & EXPERIENCE:

- Twenty-four years experience as an administrator of a state agency with direct responsibility for budget development and administration, planning, organizing, directing, staffing, and program services delivery.
- Masters degree in Public Administration; over twenty years experience in training executives to achieve excellence in government, manage and implement change, increase organizational effectiveness, and maximize program efficiency.
- Conducted in-depth management studies for criminal justice agencies for the states of Massachusetts and New Hampshire. These studies assessed the delivery of program services by agencies with statewide responsibilities and provided recommendations for increasing organizational efficiency and agency credibility.
- Over thirty-five years of experience in researching, writing, and administering a wide variety of federal and state grants. Grants involved in excess of several million dollars for a wide variety of purposes: personnel, equipment, training, research, and providing services with targeted priorities.
- Extensive experience in researching, evaluating, and implementing a wide variety of projects. These projects varied in scope and duration, and many required the involvement and partnership of multiple agencies and personnel throughout the state, as well as the enactment of state legislation.
 - Evaluation performed for the Substance Abuse Division - WDH – “Responsible Server Training Program” – October 2002
 - Managed the Wyoming First Lady’s Initiative to Reduce Underage Drinking – November 2004 to September 2006
 - Currently serving as the Facilitator for the Wyoming Seat Belt Coalition
 - Managed project and authored report: A Comprehensive Review of Alcohol State Statutes: Findings and Recommendations for Reducing Underage and Binge Drinking in Wyoming - 2008

Evaluation of Alcohol Factors in Wyoming Custodial Arrests

- Thirty years of experience in conducting a variety of feasibility studies
 - Conducted numerous feasibility studies for the Wyoming Legislature
 - Most recent feasibility study conducted for the Town of Wright: “Should the Town of Wright create its own Police Department?” May 2004
- Conducted executive level training for the US Department of Justice/ State Department:
 - Instructed a 40-hour training course entitled “The Office of Professional Responsibility” for the Lithuania National Police command staff - 2001
 - Instructed an 80-hour training course entitled “Sex Crimes Investigations” for Investigators and Prosecutors in Lithuania - 2001
- Faculty - Criminal Justice Department - University of Wyoming (September 2000 to present)
 - Currently teaching the following courses: Criminal Justice Management, Concepts of Modern Policing, Ethics in the Administration of Justice, Criminal Justice Civil Liability, Politics and the Judicial Process, Criminal Courts and Processes, and Police Deviance.
- Management consultant for the Wyoming Association of Sheriffs and Chiefs of Police - Projects completed or currently in progress:
 - Evaluation of Alcohol Factors in Custodial Arrest in Wyoming – May 2005
 - Statewide Public Opinion Survey: Alcohol Issues and Policies (phone survey of 4,600 residents of Wyoming – Report released November 2006
 - Evaluation of Alcohol Factors in Custodial Arrests in Wyoming - 2006: Phase I (data collection), Phase II (Analysis, Findings and Strategies)
 - Evaluation of Alcohol Factors in Custodial Arrests in Wyoming - 2007
 - Project Manager for the Enforcing Underage Drinking Laws Program – September 2007 to May 2009
 - Project Manager for WY-CIA Wyoming Communities in Action – Phase I, Phase II – September 2007 to May 2009
 - Project Manager for Reducing Underage Drinking and Driving – October 2007 to September 2009
 - Project Coordinator for Project Safe Neighborhoods in Wyoming: A national initiative directed by the US Department of Justice aimed at reducing gun crimes and violence in this country. Initiative is currently in its sixth year of operation in Wyoming.
- Facilitator/Coordinator for the Wyoming Seat Belt Coalition – December 2006 to present
- Administration and coordination of WYDOT-Highway Safety’s Selective Traffic Enforcement Program Grants for Wyoming law enforcement agencies– December 2008 to present
