

August 30, 2018

Dear Shareholders,

It's my privilege to introduce myself as the new Chief Executive Officer of GreenLink International. I want to provide you with some insight into the new leadership and direction of the company as we expand into the global cannabis market.

First off, I want to thank Doug Mac Donald for his unwavering dedication to the company and the long history of transparency and commitment to the shareholders. Doug will remain a key member of our leadership through the Board of Directors and shares our vision for the long-term growth plan.

As shareholders, you should expect a high level of communication from management on the company's activities, product developments, and business engagements. Through regular press releases and the expansion of our investor relations staff, I am committed to increasing the level of transparency and flow of information we share with you. Keep in mind that certain undisclosed financial information and material non-public information cannot be freely disclosed as is the case with all public companies, but it is one of our core goals to be the most transparent company in the industry.

I am confident that the current and upcoming changes will reflect positively on our financials. As we roll out our full platform, you will see one of the most progressive operations in the cannabis sector. Over the last decade I've worked in this industry with the sole intention of executing my plan on the public platform and I can't wait to put our team in motion. The core of the cannabis space is overloaded with operators who fall into two categories; 1) Industry pioneers who lack the business acumen to run a commercial enterprise and 2) Institutional suits who lack the industry experience to develop products and brands that resonate with consumers. I assure you GreenLink will operate with a healthy balance of professionalism and industry experience to expand operations throughout North America and beyond.

There is no question we are in a foot race to establish market share. Our family of brands and partnerships have been growing throughout the leadership change and with future funding as well as the implementation of our growth strategy, we will expand into four new markets over the next 18 months. We have no intention of slowing down until our family of brands and services are globally recognized as the industry standard. Future developments will also include the implementation of our E-Debit merchant services platform.

Finally, as I am sure you are all aware, GreenLink is in the process of updating its filings and removing the caveat emptor. This administrative task is nearing completion and we look forward to the market's reaction to our current and future filings under a free and clear symbol.

In closing, I appreciate the trust of Doug Mac Donald, the Board of Directors, and most importantly you, the Shareholders. I'm excited to be here and look forward to leading this company to the forefront of one of the fastest growing industries in the world.

Best regards,

*Jake George*
