

PRODUCT DATA SHEET

Rinse Aid – Water Spotting Eliminator

DESCRIPTION

Rinse Aid eliminates water spots and soap scum on dishware in all kinds of dishwashing operations. It is to be used in automatic rinse ejectors on commercial dishwashing equipment. **Rinse Aid's** special blend of wetting and rinsing agents may also be used during hand washing and/or added to the rinse water for quick running of the water off the dishes even if in hard water.

FEATURES

- **HARD WATER PERFORMANCE IS EXCEPTIONAL**
- **MAY BE USED AS A RINSE WATER ADDITIVE**

USE AND DIRECTIONS

AUTOMATIC DISHWASHER: Add to automatic rinse ejectors*

HAND WASHING: Add 2 teaspoons per every 3 gallons of hot rinse water

**If no rinse ejector is available, add 2 teaspoons during the final rinse. Follow your equipment's manufacturer's recommendations*
