Training & Quality Personnel

Lexus Protection Services officers undergo a rigorous screening process which includes a full national background investigation... not just state-wide!

We are dedicated to proper supervision and support of our on-site officers as well as our job performance standards. Company ceo/president, Dani Journak is hands-on and makes it a point to visit all sites on a weekly basis to ensure a smooth operation and to ensure that all site protocols are being maintained as well as to have constant open communication with on-site company men and safety personnel.

All officers undergo site specific training in addition to our regular guard training program to ensure that the needs of our clients and individual sites are met.

The Oil & Gas Industry has specific security concerns which include maintaining a constant site head count to protecting high-dollar equipment and personnel.

Lexus Protection Services will work hand in hand with your team to create a security solution customized to meet the individual needs of your site and work with your EHS team to ensure that all safety requirements are met and maintained. We will provide a guard shack at your checkpoint that also serves as a first aid station and serves for on-site file storage. Our officers are outfitted in all required safety equipment to include FR clothing, hard hats, and safety glasses and as an added service to our clients we provide guards whom are also ATSSA Certified for flagging duties. Imagine a team of professionals certified and trained to provide both security checkpoint services and flagging services coordinated from the pad...

All at UNBEATABLE rates!

An oil drilling rig mounted on a barge, with a tall derrick and various support structures.
