➤ Discussion

- We are currently a group made up of providers, are we going to include more people who are not providers who are still interested in prevention?
- We should incorporate all causes; prevention of child abuse, DV, diabetes, SA, IPV, TDV, awareness, public health and/or include more people- volunteers.
- Find our identity of the group, "What are we doing?" Are we a prevention against DV Group? A prevention group? What are we based around?
- How do we be more inclusive of more people?
- **Have a vision meeting!?** Email different entities around town, tribes, corporations, businesses, youth groups, groups in general asking if they want to send a representative to the meeting.
